

# Samyang Holdings 2021 Sustainability Report

Ingredients that Add Value to Life

# About this Report

## Overview of Report

This report is the first sustainability report to be published by Samyang Holdings Corporation. Samyang Holdings Corporation (hereinafter referred to as Samyang Holdings) is committed to transparently disclosing the directions and outcomes of its sustainable management practices and this first sustainability report was published in September 2022 to actively communicate with stakeholders. This report will be published annually in Korean and English. Through the sustainability report, Samyang Holdings will be able to collect feedback from stakeholders and reflect their views in its business activities.

## Reporting Period

The reporting period included in this report is from January 1, 2021 to December 31, 2021 and the report contains the sustainable management activities and performance of Samyang Holdings. To track quantitative performance, data from the last three years, from 2019 to 2021, have been included for comparison. In addition, some items on qualitative activities may include data from the first half of 2022, in consideration of the time of publication.

## Reporting Scope

The financial data in this report accord with the consolidation standards of the Korean International Financial Reporting Standards (K-IFRS). For non-financial data, sustainable management performance information has been collected from all business sites. In any cases where there is a difference in the reporting scope, this fact is explained within the report.

## Reporting Principles and Standards

This report was prepared in accordance with the Core Options of the Global Reporting Initiative (GRI) Standards, the principles of the Sustainable Development Goals of the UN Global Compact, and the requirements of the Sustainability Accounting Standards Board (SASB) of the United States. Financial performance was reported based on the consolidated financial statements of Samyang Holdings according to K-IFRS.

## Third-party Verification

The financial information in this report had been verified through an accounting audit performed by an independent audit firm. In order to ensure objectivity, fairness, and credibility, this report was verified by a specialized verification agency that has no interest relations with Samyang Holdings.

## Inquiries

The sustainability report of Samyang Holdings is available for viewing and downloading on the company's website ([www.samyang.com](http://www.samyang.com)). Contact us for more details or inquiries.

## CEO Message

Dear respected stakeholders of Samyang,  
Thank you for showing your interest in and support for Samyang Holdings and Samyang Group.

Samyang Holdings  
President and CEO,  
Eom Tae-Ung

While we experienced the COVID-19 pandemic, the rate of changes in the external environment and factors of uncertainty have increased drastically. In an age of changes, when business practices and even our life paradigms are changing, sustainability has become the top-priority factor to be considered for the survival and long-term growth of companies.

Accordingly, Samyang Group has selected ESG goals and tasks by reorganizing the ESG values that the Group has been pursuing ever since its foundation, such as integrity and trust. Samyang Holdings will focus on the following activities to raise our level of sustainable management across all group affiliates, to meet global standards.

**First, we will sustain and further develop the spirit of our company's foundation by engaging in ESG management.**

Since its foundation in 1924, Samyang Group has been pursuing integrity and trust to contribute to the national economic development and fulfill our corporate social responsibility. The methods of practicing ESG management have changed over time, but Samyang's management philosophy, focused on growing with all stakeholders, has remained unchanged. Samyang Group will prepare for the next 100 years by preserving and nurturing its foundational spirit through ESG management.

**Second, we will change our business portfolio and management system while focusing on ESG.**

Samyang Group will manufacture eco-friendly products reflecting our ESG values, making people's lives more abundant and convenient. Samyang Group has already established future growth strategies with eco-friendly themes, seeking improvement in our business constitution and identifying new growth engines.

Regarding our management system, Samyang selected core issues by performing materiality assessments of each ESG domain, including the environment, social, and governance. We will build a management system that accords with global standards by conducting company-wide improvement activities.

**Third, we will enhance the ability to execute our goals in practice by building ESG infrastructures.**

We must execute short-term tasks as well as long-term tasks looking ahead into the next 20 to 30 years in order to practice ESG management on the global level. Samyang Holdings will improve the ability of Samyang Group to practice ESG by establishing an ESG Committee and exclusively dedicated organizations, prioritizing ESG values in their decision-making processes. In addition, by building a system that collects ESG-related data and manages ESG information, we will continually check our ESG management and transparently disclose information to our stakeholders.

Samyang Group endeavors to become a global enterprise that supplies specialty materials and solutions in health, environment, and high-tech industries, working toward the next 100 years. We look forward to seeing your interest in and support for Samyang Group, trying to make our lives more abundant and convenient.

Thank you.

Samyang Holdings  
Vice President and CEO,  
Lee Young-Joon

# Introduction of Group

We create future growth engines in the business fields of chemicals, food, biopharmaceuticals, and packaging.

## Samyang Holdings

Samyang Group launched the holding company system in November 2011 and has undergone many changes and innovations, establishing key areas of business growth in chemicals, food, biopharmaceuticals, and packaging. Samyang Holdings, the holding company of Samyang Group, has various affiliates such as Samyang Corporation and Samyang Packaging. Each affiliate has secured competitiveness based on a governance system that enables agile and professional decision-making according to the characteristics of each business group. In 2021, Samyang Holdings expanded its investments in the biopharmaceutical business by merging with Samyang Biopharm.

Current Net Income*	KRW 553.0 billion
Assets*	KRW 6.2 trillion
Number of Employees*	3,343 persons

\* For all business sites of group companies, as of the end of December 2021

## Samyang at a glance

Samyang Group was founded by Chairman Sudang Kim Yeon-Su in 1924 and it has consistently evolved by practicing management based on integrity and trust. Since the 1950s, Samyang expanded its business areas to sugar manufacture, milling, and chemical fibers, taking pride in making food, clothing, and shelter available to people and contributing to the national economy. In November 2011, we established the current holding company system by separating the manufacturing business sector from the investment business sector, thus raising corporate values and creating a responsible management system for each business area. Samyang Group has adopted a vision to “Ingredients that Add Value to Life,” preparing for the 100 years to come by entering the global market, finding specialty (functional) products, and promoting new businesses in the areas of food, chemical materials, packaging, and biopharmaceuticals.

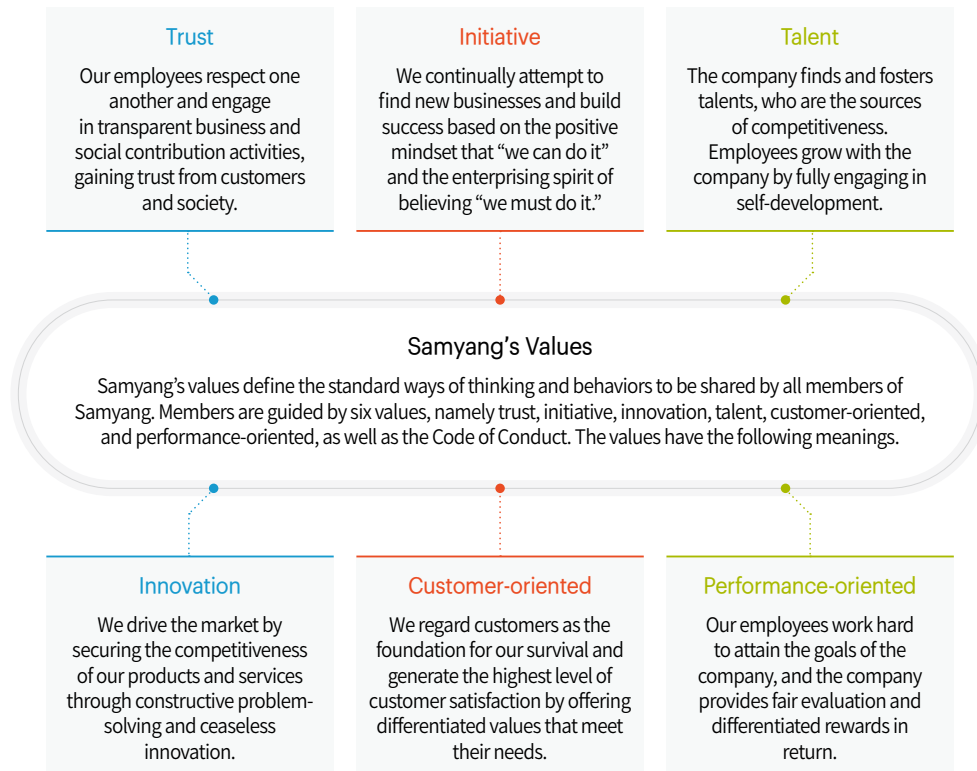

# Samyang's Values

## Life's Ingredients.

Samyang's vision is an "Ingredients that Add Value to Life." Samyang concentrates on sophisticating its business portfolio, pioneering new markets in South Korea and overseas, expanding the range of highly value-added products, and preparing for the future by building on differentiated R&D capabilities.

Samyang simultaneously promotes digital transformation with the innovation of our corporate culture, which embraces "customer-oriented" and "performance-oriented" values necessary for growth alongside the values of "trust," "initiative," "innovation," and "talent." While fulfilling its corporate social responsibility, Samyang will become a global enterprise that offers greater satisfaction to customers and higher profits to shareholders through outstanding products and services.

## The Spirit of the Company's Foundation

Corporations should not remain in leagues of their own in which they merely pursue their own interests, but rather should have a historical sense of calling for the country and society as a whole and take on the responsibility of contributing to national prosperity.

When founding Samyang and whenever starting a new business, Chairman Sudang Kim Yeon-Su questioned, "Is it necessary for our nation and is it permanent and promising? Is it rewarding enough to sustain the livelihood of employees, and can our company get a return for its investment?"

These three questions encapsulate the management philosophy of Chairman Sudang Kim Yeon-Su, who valued corporate social responsibility, consideration for employees, and mutual development of the company and society. Inheriting this management philosophy of the founder, Samyang pursues development as a sustainable company that returns profits to society, conducts transparent management, and seeks substantial qualitative growth.

Samyang has sustained the management philosophy of the founder while adding a contemporary interpretation to define our vision as an "Ingredients that Add Value to Life." Today, Samyang practices ESG management to gain the trust of society, customers, business partners, shareholders, and investors by operating its life-enriching businesses in a transparent and responsible way.

# History

Samyang has constantly evolved since its foundation in 1924.

# Introduction of Business Sites

## Business Sites in Korea

Samyang Group manages business and research activities, mainly at its Headquarters in Jongno, Seoul, Samyang Discovery Center in Pangyo, and Central Research Center in Daejeon. Samyang runs various manufacturing plants for food, chemicals, biopharmaceuticals, and packaging products in locations including Ulsan, Jeonju, Asan, and Daejeon, to secure an efficient and stable production capacity.

### South Korea

Packaging	0.4	Samyang Packaging	Bottles (PET and preform bottles), aseptic, PET recycling, etc.
Other	0.1	Samyang Data Systems, Samyang Holdings USA	IT services, new drugs, etc.

# Business Areas

## Vision 2025

Samyang Group established its "Vision 2025" defining its mid- to long-term growth strategies. In addition, Samyang Group has improved its business structure and is finding new growth engines to increase the proportion of its specialty businesses and its share in the global market through a more sophisticated business structure. Currently, Samyang Group fosters businesses related to materials for the health & wellness industries, materials for the high-tech semiconductor and display industries, and eco-friendly materials in all business areas of the Group, including food, chemicals, packaging, and biopharmaceuticals.

## Food Business

Food ingredients foster health and nurture energy for happier lives. Samyang has remained dedicated over the years to its food business. Samyang has become a leading food and service innovator by developing highly value-added food ingredients, advanced dining culture, food distribution, and consumer goods, which enrich our lives and foster better health.

# Stakeholder Engagement

## Definition of Stakeholders and Communication

Samyang Holdings, the holding company of Samyang Group, defines shareholders, investors, business partners, employees, customers, non-profit organizations, and associations as the primary stakeholder group according to their legal, financial, and operational responsibilities and influences. Samyang Holdings recognizes the importance of communication with stakeholders and operates different communication channels for each stakeholder, continually receiving feedback from stakeholders through such channels to reflect their major interests in the corporate management process.

	Shareholders and Investors	Business Partners	Employees	Customers	Non-profit Organizations and Associations

# Materiality Assessment

## Materiality Assessment Process

Samyang Holdings, the holding company of Samyang Group, carried out a materiality assessment process involving stakeholders to identify the material issues that need to be managed in pursuit of sustainable management. We identified a pool of 23 sustainability issues by analyzing internal and external environments and issues faced by similar companies in South Korea and abroad. By receiving opinions from stakeholders through surveys and undergoing expert evaluation, we selected 10 material issues.

## Materiality Assessment Results

Sustainability Materiality Assessment Matrix of Samyang Holdings

# Material ESG Issues

Samyang Holdings, the holding company of Samyang Group, identified stakeholder relevance and business significance by conducting surveys on internal and external stakeholders and experts before publishing this sustainability report. Based on this research, Samyang Holdings selected 10 material issues. The materiality assessment process carried out to identify the material issues is disclosed on page 15 of this report.

“Ethical and Compliance Management” was selected as the top-priority issue during materiality assessment and it is a critical issue directly linked to compliance and transparent management, which is the founding purpose of the holding company. “Business Portfolio Diversification” is another material issue that underscores the roles and responsibilities of the holding company in supporting and cooperating with group companies to enhance corporate values and strengthen competitiveness. “Eco-friendly Management and Climate Change Response,” “Promotion of Social Contribution Activities,” and “Strengthened Information Security” are issues reflecting the commitment of Samyang Group to drive qualitative growth by internalizing ESG management in its business strategies.

Samyang Holdings will systematically respond to the material issues selected through its materiality assessments, disclose outcomes by annually publishing its sustainability report, and actively communicate with stakeholders. Moreover, by performing the materiality assessment for the sustainability report, Samyang Holdings will identify the ESG trends and the interests of stakeholders, generate corporate strategies, and strengthen ESG management.

Samyang Holdings reviewed the reasons for selecting each of the 10 material issues during the materiality assessment. The current responses of Samyang Holdings, major outcomes, and goals that can contribute to the UN SDGs\* were analyzed as follows. More details are presented in the Environmental, Social, and Governance section of this report.

	Material Issues	Background of Selection	Issue Management Strategies	Major Activities and Outcomes	UN SDGs(*)
<b>Environmental</b>  	Eco-friendly Management and Climate Change Response	The world is facing a climate crisis with repercussions beyond extreme climate change. Tackling the climate crisis has become a requisite for corporate management. With increasing regulations in response to the climate crisis, there is a greater burden of reducing GHG emissions, and companies must respond proactively.	Samyang Holdings has built an ESH system for eco-friendly management and is reinforcing its environmental management system. In addition, Samyang Group is preparing to declare RE100 and has established the 2050 Net Zero Road Map to cope with climate change.	<ul style="list-style-type: none"> <li>• Building an ESH system for eco-friendly management and reinforcing the environmental management system</li> <li>• Preparing to declare RE100 and establishing the 2050 Net Zero Road Map</li> <li>• Practicing 119 Carbon Dieter</li> <li>• Carbon reduction activities in partnership with local communities</li> </ul>	  
	Management of Waste and Hazardous Chemical Substances	Environmental issues have been exacerbated by the depletion of resources and waste and hazardous chemicals are continually causing accidents. It is necessary to make a transition to a circular economy where resources are used efficiently and achieve a management system designed to prevent accidents.	Samyang Holdings strives to minimize its environmental impact by reducing waste generation in its business and manufacturing processes. In addition, Samyang Holdings prevents chemical accidents by forming a management system to control hazardous chemical substances.	<ul style="list-style-type: none"> <li>• Managing volumes of waste generated and treated</li> <li>• Building a system for the management of hazardous chemical substances</li> </ul>	
<b>Social</b>	Safety and Health Management at Business Sites	With the growing attention of stakeholders to safety and environmental issues, companies have a heightened awareness of their safety and environmental responsibilities. Companies are required to establish and implement strategies for minimizing the impact of their businesses on safety and the environment.	Samyang Holdings recognizes the safety and health of employees to be its top priorities and observes the Safety and Health Management Guidelines. Samyang Holdings has built safety and health management systems to strengthen related activities.	<ul style="list-style-type: none"> <li>• Declaring the Safety and Health Management Guidelines</li> <li>• Safety and health management activities</li> <li>• Raising the PSM level</li> <li>• Sustaining an accident-free record three times higher than the standard goal</li> </ul>	

(\*) UN Sustainable Development Goals (SDGs) : 17 ultimate goals for humankind to attain from 2015 to 2020 for the sustainable development of international society, determined by the UN

Material ESG Issues

Social

Governance

Material Issues	Background of Selection	Issue Management Strategies	Major Activities and Outcomes	UN SDGs
Guarantee of Product Quality and Safety	Companies must provide highly safe products to customers to subsist and grow sustainably. Manufacturing and selling safe products are crucial to ensuring the safety of customers.	Samyang Holdings operates a well-organized quality management system to increase the safety of its products. In addition, Samyang Holdings manages product safety by implementing in safety management activities for each production process.	<ul style="list-style-type: none"> <li>Operating a well-organized product quality management process</li> <li>Managing product safety</li> </ul>	
Promotion of Social Contribution Activities	The symbiosis of companies and local communities has been embraced as a key focus of corporate operations. Companies must conduct social contribution activities while maintaining a symbiotic relationship with local communities, seeking mutual growth.	Samyang Group strives to fulfill social responsibilities and grow with local communities. Samyang Group operates social foundations to pursue the development of local communities, foster talents, and protect local communities.	<ul style="list-style-type: none"> <li>Overcoming social crises by conducting various activities to address needs arising from the COVID-19 pandemic</li> <li>Donated KRW 300 million to the Community Chest of Korea</li> <li>Provided scholarships for 2021 through the Yangyoung and Sudang Foundations</li> <li>Held the award ceremony for the 30th Sudang Awards</li> <li>Honored with a plaque of recognition as a 2021 Social Contribution Company</li> </ul>	
Strengthening Information Security	In the age of Industry 4.0, information threats are becoming increasingly intellectualized and sophisticated. It is important to operate systems stably and protect personal information against cyberattacks such as hacking and ransomware.	Samyang Group established an information security policy to improve the safety and reliability of organizational and personal information, identified information security risks, and prepared response measures.	<ul style="list-style-type: none"> <li>Strengthened the personal information protection policy</li> <li>Introduced the security system</li> <li>Conducted information security education</li> <li>Conducted mock training for defense against viruses</li> </ul>	
Governance	There is a growing social interest in governance, and laws related to governance are being reinforced. The expertise and independence of governance are emphasized as key issues for the sustainable growth of companies.	Samyang Holdings strengthens the expertise and independence of its directors to ensure the soundness of its governance. In response to the increasing demand for ESG management, Samyang Holdings will install an ESG Committee and practice sustainable management.	<ul style="list-style-type: none"> <li>Operating the External Director Candidate Recommendation Committee</li> <li>Newly establishing the ESG Committee</li> </ul>	
Ethical and Compliance Management	Corporate social responsibility has become a prominent keyword in corporate management. Globally, regulations applied to ethical management and anti-corruption are becoming stricter.	Samyang Group has continually practiced ethical management, since its declaration of ethical management goals in 2013. All employees of Samyang Group observe the Five Principles of Ethical Management and Practice Guidelines.	<ul style="list-style-type: none"> <li>Strengthening ethical and compliance management</li> <li>Operating internal reporting channels</li> </ul>	
Transparent Disclosure of Information	There is increasing demand for information disclosure to promote transparent corporate management. It is becoming important to communicate with stakeholders by disclosing information transparently.	Samyang Holdings discloses its information to communicate with stakeholders. 19 Eco-friendly Management and Climate Change Response Material

25 Managing Waste and Hazardous Chemical Substances Material

## Why Does It Matter?

Climate change issues, constituting a climate crisis and a climate emergency, are the biggest challenges currently confronted by humanity.

We are already experiencing extreme climate changes that occur globally, such as heavy rains, heat waves, and forest fires.

The international community is accelerating efforts to suppress global warming and governments in various countries are strengthening their policies to reduce GHG emissions.

**Material**

# Eco-friendly Management and Climate Change Response

No one is free from the responsibility of addressing the climate crisis. Eco-friendliness is the new standard and requisite for corporate management. Major countries demand companies to actively participate in eco-friendly policies and climate change responses, increasing the intensity of environmental regulations. Accordingly, it is now essential to analyze global environmental trends and build a proactive response system. Samyang Holdings contributes to preserving the abundant life of people and the Earth's environment through corporate activities that make our lives abundant and convenient.

## Eco-friendly Management

### Eco-friendly Policies and Goals

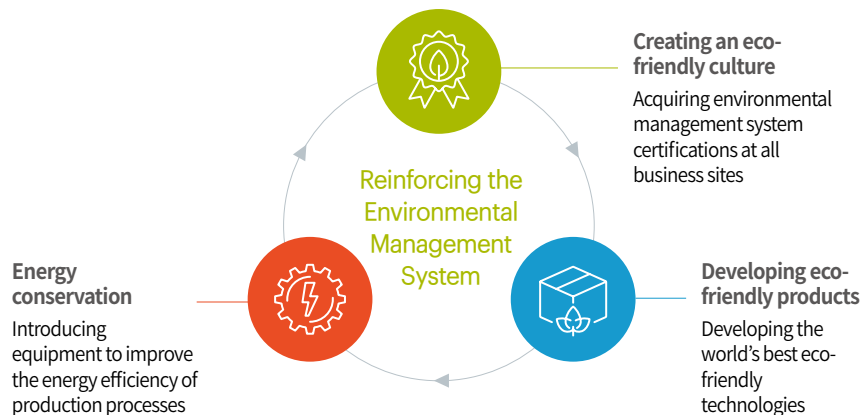

Samyang Holdings continually discovers and improves factors that affect the environment, thus protecting the environment and actively participating in the cause to make the Earth clean and safeguard abundant and convenient lives of people. Samyang Holdings faithfully abides by the environmental laws of the Republic of Korea, various requirements related to the company, and environmental regulations determined by the company. Samyang Holdings engages in activities to prevent environmental accidents by blocking factors that potentially affect the environment, such as the leakage of pollutants and fires. In addition, Samyang Holdings promotes eco-friendly management by raising awareness of accident prevention measures and environmental protection through the education and training of all employees and business partners.

### Organizational System for Eco-friendly Management

Samyang Holdings establishes environmental goals for each business site and implements detailed practice plans to promote eco-friendly management in an organized manner. Each business site operates an environmental management department to attain the goals established. Each team conducts environmental management activities, inspects conditions, and reports outcomes to the CEO. We make company-wide decisions for eco-friendly management through this process.

### Environmental, Safety, and Health Guidelines

Samyang Holdings established the Environmental, Safety, and Health (ESH) Guidelines for application to all corporate affairs, set up goals based on the ESH Guidelines, and is endeavoring to attain these goals. In addition, Samyang Holdings expresses its commitment to eco-friendly management by actively communicating with various stakeholders.

We faithfully abide by in-house and external laws related to the environment and safety and other requirements.

- We minimize the emission of environmental pollutants and actively practice waste reduction and recycling.
- We quickly remove risk factors related to environmental and safety accidents and assess these factors through routine environmental and safety inspections.
- We conduct periodic and effective education and training on environmental and safety issues, cultivating environmental and safety awareness.
- We minimize the environmental impact of products during the stages of design, manufacture, sale, transportation, and service to practice green and sustainable management, contributing to the environmental preservation of local communities.

Marine preservation activities

Go-Go Challenge

Nature purification activities

### Building an ESH System for Eco-friendly Management

Samyang Holdings has formed an integrated ESH system to further advance and standardize our work process and aims to manage various indicators related to ESH management. The integrated ESH system intends to proactively respond to environmental and safety laws and minimize legal risks. Samyang Holdings manages environmental, safety, and health data with an advanced ESG management system.

### Environmental Management Education

Samyang Holdings conducts periodic education for its employees related to environmental issues to prevent environmental risks. In particular, Samyang Holdings faithfully conducts education for persons managing and handling hazardous chemical substances pursuant to the Chemical Substances Control Act. In addition, there are non-regular education programs to improve the environmental awareness of employees by dedicating time to raising awareness of environmental issues and policies.

### Environmental Education Status of Samyang Holdings in 2021

Title of Educational Program	Hours of Education	Number of Persons Who Completed the Educational Program				Total Hours of Education
		Pharmaceu-tical Plant	MD Plant	Gongju Plant	Total Number	
Technical worker and manager course	16	3	5	0	8	128
Education for persons handling hazardous chemical substances	16	22	11	0	33	528
Education for workers related to hazardous chemical substances	2	27	189	19	235	470
Manager license course for hazardous chemical substances	32	0	0	1	1	32
Total	66	52	205	20	277	1,158

### Green Purchases

Samyang Holdings observes environmental laws to fulfill its social responsibility and promotes low-carbon, green purchases to take account of environmental factors in the early stage of purchasing. Samyang Holdings preferentially purchases products with environmental marks, recycling certifications, energy-saving marks, waste reduction, and other environmental certifications to save resources and reduce environmental pollution. By continually purchasing such eco-friendly products, Samyang Holdings fulfills its social responsibility as a sustainable company.

### Samyang Group

### Environmental Preservation Activities

Samyang Group participates in various environmental protection activities by operating programs that link the company to local regions. Many business sites of the Group located around the country practice the One-Company, One-Stream Purification Movement to preserve clean nature. In addition, Samyang Group has formed sisterhood relationships with farming villages near its business sites in cooperation with NongHyup to increase the understanding of farming village residents and pursue the balanced development of companies and farmers. Through periodic labor-management collaboration, Samyang Group conducts marine preservation activities to protect nature. There are other environmental preservation activities in place, such as road cleaning and pagoda volunteer activities.

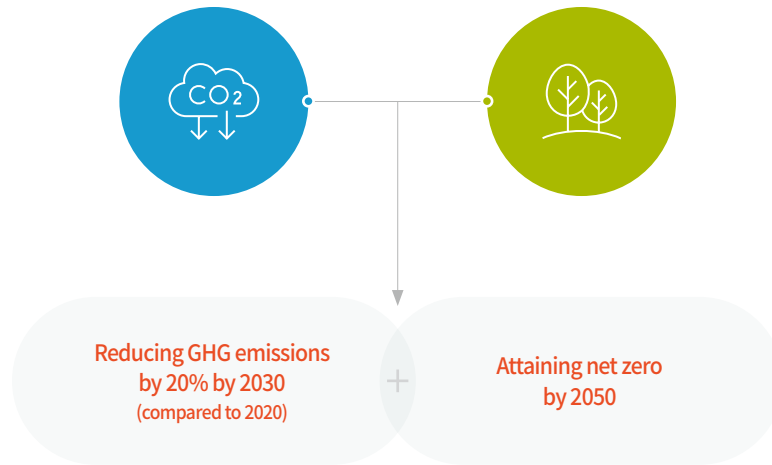

Samyang Group conducts various environmental campaigns, and the executives of each company within Samyang Group have enthusiastically demonstrated their commitment to improving the environment. The “Go-Go Challenge” is a representative example of environmental campaigns operated by the Samyang Group, and it was started by the Ministry of Environment in January 2021. Participants of this relay campaign promise to practice “one thing they can do” and “one thing they cannot do” for a clean environment and then designate three other parties to participate in the campaign. Through this campaign, the CEOs of Samyang Corporation and Samyang Packaging promised “to reduce the use of non-recyclable daily supplies and to increase the use of eco-friendly supplies for a healthier Earth.” Samyang Group joins the efforts to adopt small practices in everyday life to hand down a better environment to future generations.

## Climate Change Response

### Climate Change Response

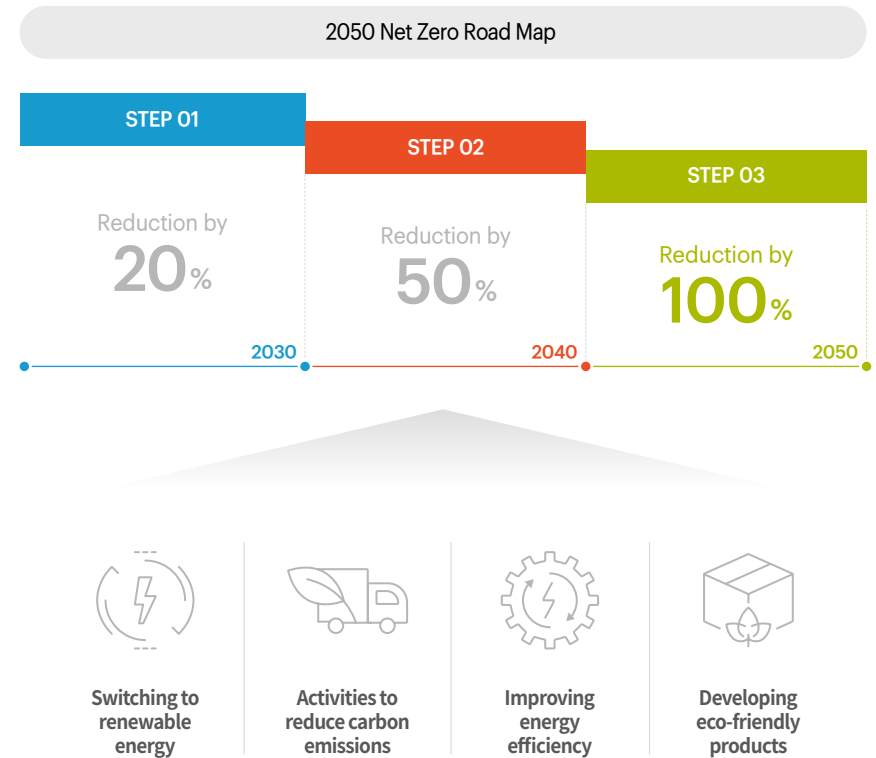

Eco-friendly management has emerged as a core element of ESG and investment institutions and civil societies in Korea and abroad are constantly placing pressure on companies to respond to climate change. Samyang Group has devised the 2050 Net Zero Road Map according to the SBTi standards, a joint initiative of the WWF, CDP, UNGC, and WRI, in order to achieve the goals of the Paris Agreement. In addition, with the increasing demand for renewable energy sources that can replace existing resources such as petroleum and coal, Samyang Group is establishing business strategies associated with renewable energy. Furthermore, Samyang Group is preparing group-wide initiatives to switch all energy sources to low-carbon fuels and declare RE100.

### Reducing the Impact of Climate Change

### Net Zero

Major countries, including the Republic of Korea, have declared the goal of attaining net zero by 2050 and established GHG reduction goals (NDC) according to international agreements. Samyang Group is planning an implementable mid- to long-term road map to achieve net zero by 2050, taking part in the global movement to cope with the climate change crisis.

Daedeok-gu Carbon Dieter Store

Carbon Dieter Show

**Activities to Reduce GHG Emissions**

Samyang Holdings has established systematic measures to reduce its GHG emissions. Samyang Holdings appointed responsible persons and working-level managers at each plant to manage the GHG status strategically. By setting up annual GHG reduction goals for each plant and implementing policies based on the characteristics of each business site, Samyang Holdings actively participates in the South Korean government's GHG reduction policy and conducts various activities to minimize the impact on climate change.

**GHG Emissions\_Samyang Holdings Biopharm Group**

Division(*)	Unit	2019	2020	2021
Direct Emissions (Scope1)	tCO <sub>2</sub> e	10.30	10.85	59.82
Indirect Emissions (Scope2)	tCO <sub>2</sub> e	5,889.60	5,751.67	12,282.39
Total Emissions	tCO <sub>2</sub> e	5,899.90	5,762.52	12,342.21

(\*) Out of the three plants (Pharmaceutical Plant, Gongju Plant, and MD Plant), the data from 2019 and 2020 for two plants (Pharmaceutical Plant, Gongju Plant) have been excluded.

**Samyang Holdings Biopharm Group**

**Agreement to Practice Being a 119 Carbon Dieter**

The MD Plant of Samyang Holdings Biopharm Group signed an agreement to “Practice Being a 119 Carbon Dieter” with Daedeok-gu, Daejeon, and is building a system to cooperate on GHG reduction campaigns. The phrase “119” in the agreement refers to “using zero disposable (1-time use) products, lowering the mean air temperature by 1 degree Celsius, and saving the Earth” (the Korean word for Earth sounds like the number 9). “Carbon Dieter” refers to an individual or organization that practices carbon reduction in everyday life and participates in spreading a carbon reducing culture. Through this agreement, Samyang Holdings and the district government cooperate in coping with climate change risks and encouraging a vegetarian diet.

119 Carbon Dieter Agreement

119 Carbon Dieter Agreement ceremony

**Samyang Holdings Biopharm Group**

**Carbon Reduction Activities with Local Communities**

Samyang Holdings participated as a corporate panel in the “Carbon Dieter Show,” a talk show hosted by the Daedeok-gu District Office to publicize the regional environmental policy and encourage the participation of residents and companies in the area. During the show, Samyang Holdings shared its commitment to improving climate crisis awareness and promised to continue taking part in practice campaigns.

Wastewater treatment plant

Wastewater treatment plant facility

## Efforts to Reduce Environmental Impact

### Managing Water Resources

With the global water shortage intensifying, there is a growing interest in water resource issues. Perceiving the seriousness of global water resource issues, Samyang Holdings continually engages in activities to reduce the volume of water used and discharged.

#### Managing Water Pollution and Wastewater

Samyang Holdings observes in-house operating standards for discharging water pollutants to minimize pollutant discharge and satisfy the legal discharge standards. Samyang Holdings prevents pollution accidents and minimizes the environmental impact of water pollutants by efficiently managing water pollutants, such as organic materials, suspended materials, and heavy metals.

Samyang Holdings observes wastewater management regulations to maintain wastewater in optimal conditions, checking the appropriateness of wastewater facilities through regular measurements (twice a year or more, including all water pollutant items). Samyang Holdings has reduced wastewater pollution levels by additionally installing chemical treatment facilities in wastewater prevention facilities.

### Water Resource Status\_Samyang Holdings Biopharm Group

Division	Unit	2019	2020	2021
Water usage	Tons	55,555	68,724	93,913
Usage intensity (compared to sales)	Tons/ KRW 100 million	95.59	60.21	26.67
Water intake (surface water)	Tons	55,555	68,724	93,913
Intake intensity (compared to sales)	Tons/ KRW 100 million	95.59	60.21	26.67

T-P discharged	Tons	0	0	0.01

Air Pollution Prevention Facilities

Activated carbon adsorption facility

Dust scrubbers

**Managing Air Pollutants**

Samyang Holdings intends to reduce the environmental impact of air pollutants. Concentrations of various air pollutants, such as SOx, NOx, dust, odors, and volatile organic compounds (VOCs), are kept within legal limits. When air pollutant emissions exceed the limits due to problems in equipment or processes, we take measures to lower the emissions until they meet the legal limits.

Samyang Holdings increased its frequency of replacing activated carbon and fillings in air pollutant prevention facilities, from once a year to two or three times a year. Dust scrubbers have been installed and exhaust fans and pump OH have been entirely replaced for efficient management of pollutants. In addition, an air pollutant monitoring system has been built to measure pollutants and monitor prevention facilities in real-time.

**Air Pollutant Emissions\_Samyang Holdings Biopharm Group**

Division	Unit	2019	2020	2021
NOx emissions	Tons	0.01	0	0.01
SOx emissions	Tons	0	0	0
Dust emissions	Tons	1.47	1.3	0.21
HAPs emissions	Tons	0.19	0.48	0.14
VOCs emissions	Tons	5.75	3.29	5.32
Ozone Depleting Substance (ODS)	Tons	0	0	0

**Energy management**

Samyang Holdings strategically manages the energy consumption status of each business site. The in-house GHG management system can manage energy targets and usage data, and Samyang Holdings sets annual energy reduction goals for each plant. Samyang Holdings conducts energy reduction activities by implementing policies that accord with the characteristics of each business site.

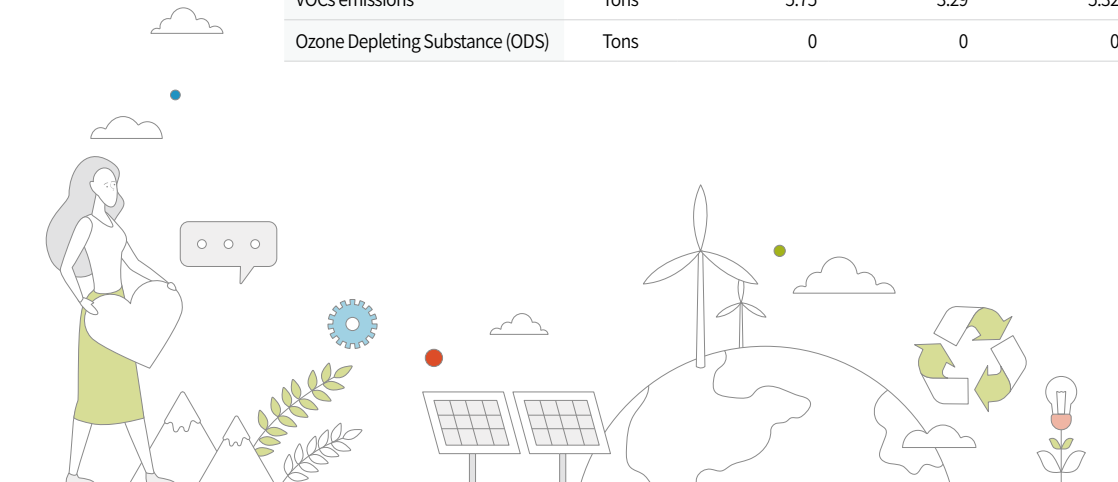

**Reviewing the Introduction of Renewable Energy**

Samyang Holdings is reviewing measures to introduce renewable energy to supply eco-friendly electricity at major business sites, reduce the environmental impact of energy usage and promote net zero step by step.

**Energy Usage Management\_Samyang Holdings Biopharm Group**

Division	Unit	2019	2020	2021

# Managing Waste and Hazardous Chemical Substances

With the sudden rise in demand for waste resource recycling and the diversification of laws on the use and treatment of chemical substances, companies are increasingly required to manage waste and hazardous chemical substances. In response, Samyang Holdings reduces its environmental impact through the safe treatment of waste, separate discharging, and minimization of discharges. In addition, Samyang Holdings established a procedure for managing hazardous chemical substances to remove risk factors throughout the life cycle of chemicals, from development to use and disposal.

## Managing Waste

### Reducing Waste Discharges

Samyang Holdings manages waste by establishing separate waste management regulations for each business site, as part of its effort to reduce the volume of waste discharged and the environmental impact of waste. We established a system to manage the waste generated at each plant and inspect the implementation status in accordance with environmental monitoring and measurement regulations. In addition, we have signed contracts with waste treatment and regeneration companies according to the environmental partner management standards and annually evaluate them on legality and appropriateness.

Samyang Holdings handles waste by observing the Wastes Control Act and records its waste treatment history on the waste management system. Samyang Holdings selected waste management and recycling companies that are adequate for the specific types of waste discharged at each business site to reduce the volume of waste incinerated and increase the ratio of recycled waste. In addition, the plants of Samyang Holdings renovated their equipment and improved processes to increase the ratio of waste recycled. Through these efforts, the rate of recycled waste has increased, and Samyang Holdings manages its waste circulation rate. In particular, Samyang Holdings recycled approximately 500 tons of waste organic solvents generated during the pharmaceutical production process, reducing the waste treatment expense by KRW 50 million.

Education on separate waste discharging

Separate locations for waste storage

## Managing Waste Storage

Samyang Holdings discharges waste to designated places by separating the waste into different types, inspecting and confirming the waste storage status and handling non-conformities according to the corrective and preventive action regulations. The results of handling waste are aggregated every time and reported to plant managers, and the performance is periodically reported to relevant agencies.

Samyang Holdings reinforced the structure of locations that store waste generated during the product manufacturing process to prevent leakage, scattering, and fire accidents. Disaster prevention equipment and apparatuses are furnished in waste storage locations at all times to prepare for emergencies. Regular education programs and campaigns are carried out for all employees to suppress waste generation and reduce environmental pollution through the strict storage of waste.

### Methods of Reducing Waste

1	Consulting consigned treatment companies to reduce the volume of incinerated waste	2	Installing equipment that distills and recovers waste IPA in the suturing process to recover a portion of waste generated
3	For waste treated by incineration, finding recycling companies to reduce the final disposition rate	4	For waste treated by consignment, using waste as reusable fuels through process improvement
5	Executing measures to reduce residues through process improvement	6	Increasing the volume of waste reused through equipment renovation

## Handling and Managing Hazardous Chemical Substances

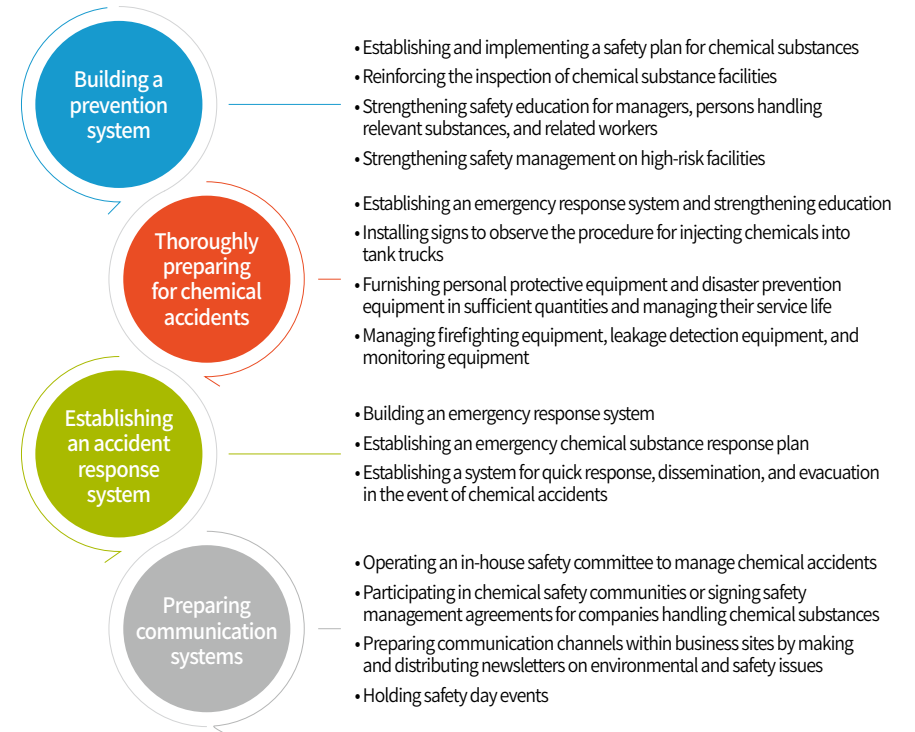

### Managing Hazardous Chemical Substances

Samyang Holdings handles hazardous chemical substances according to the hazardous chemical substance regulation established by each business site to manage possible environmental risks that can be caused by hazardous chemical substances. Samyang Holdings safely stores hazardous chemical substances in designated warehouses and facilities and disposes of them according to the standards for handling hazardous chemicals. In addition, facilities for handling hazardous chemical substances are installed and regularly inspected to strengthen inspection activities. Samyang Holdings provides information about the management of chemicals to business partners and offers guidance and technical support. Samyang Holdings consistently strives to minimize the discharge of hazardous chemical substances into the environment through monitoring and improvement.

Hazardous Chemical Substances Discharged\_Samyang Holdings Biopharm Group

Division	Unit	2019	2020	2021
Methanol	Tons	43	36	30
Dichloromethane	Tons	15	20	30

Toluene	Tons	5	5	4
Diphenylmethane-4,4'-diisocyanate	Tons	0	1	0

### Hazardous Chemical Substance Management System

### Inspection Activities to Manage Hazardous Chemical Substances

Samyang Holdings manages hazardous chemical substances through inspections. Facilities handling hazardous chemical substances undergo installation inspections after they are installed and before initiating operations, and they receive regular inspections annually. Non-regular inspections are performed within 7 days when a chemical accident occurs or upon notification by the head of a local government office related to the environment. If safety hazards are found during installation and regular inspections, Samyang Holdings performs a safety diagnosis within 20 days after receiving the inspection results.

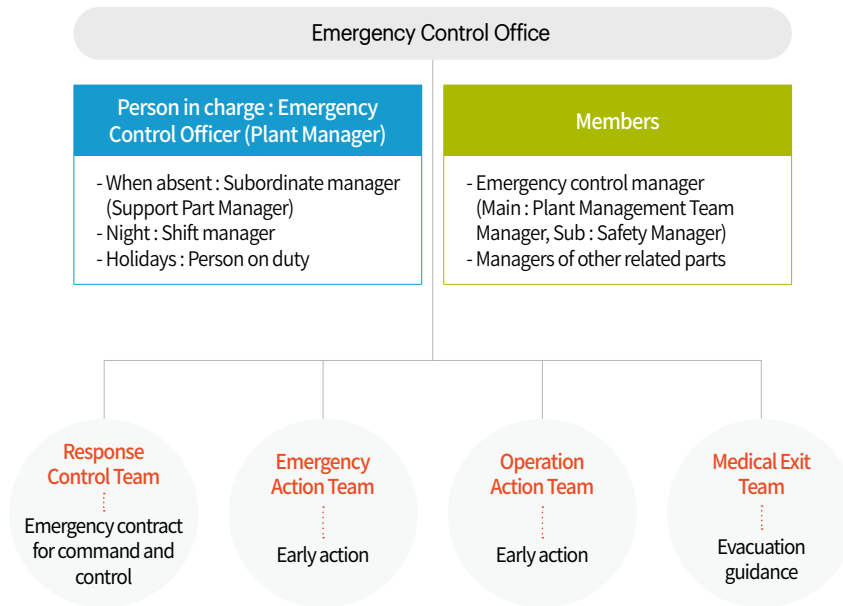

Safety Day\_Resolution to Observe Safety Rules

**Responding to Chemical Accidents**

Samyang Holdings appoints five managers to prevent leakage accidents and effectively manage hazardous chemical substances and conducts inspections at least once a week. Facilities storing hazardous chemical substances have been rebuilt into fireproof and nonflammable structures and installed with gas leakage alarm devices, bumps to prevent leakage, and shower facilities. Samyang Holdings formed an emergency response organization to establish a system for quick response, dissemination, and evacuation during chemical accidents. When chemical accidents occur, the emergency response organization uses communication channels to share environmental and safety information among business sites, such as environmental and safety legal trends, environmental and safety issues, and recommended protective equipment and safety supplies.

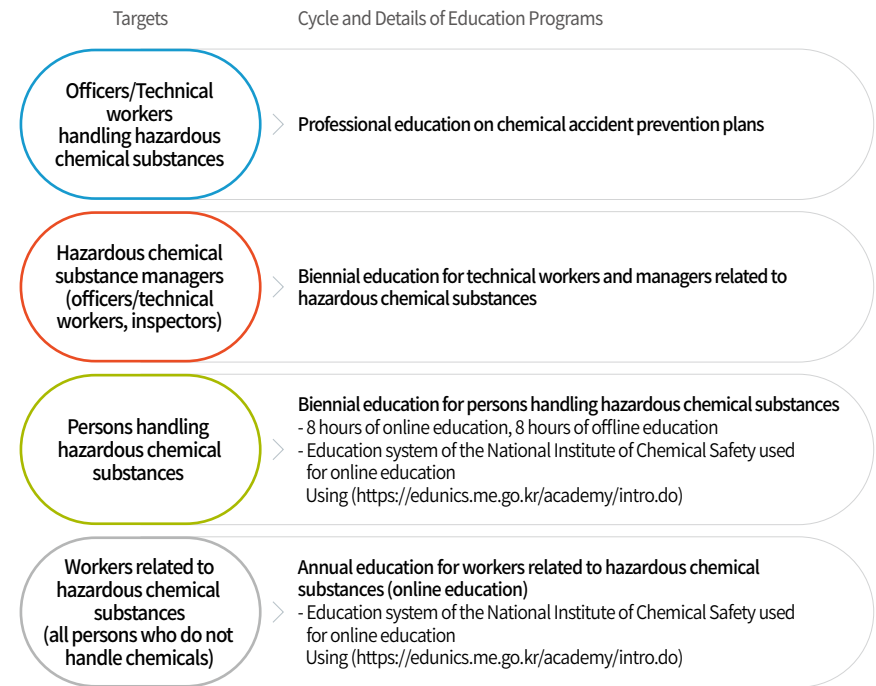

**Emergency Response Organization**

**Chemical Safety Education and Activities**

Since methods of responding to accidents differ according to the type of chemicals and accidents, it is extremely important to be aware of appropriate response methods and to secure expertise. Accordingly, Samyang Holdings aims to prevent and manage chemical accidents by conducting tailored education and training for different job positions. In addition, Samyang Holdings holds safety day events at business sites to improve the safety awareness of employees, continually encouraging all employees to build safer business sites together.

**Chemical Safety Education Status**

## Why Does It Matter?

The roles of companies have become more important with increasing corporate social responsibility. Companies must endeavor to help local communities, offer a happy work place to employees, grow by fostering talents, seek mutual prosperity with business partners, and earn the trust of consumers.

**Material**

# Safety and Health Management at Business Sites

Samyang Holdings manages safety to a degree exceeding legal standards with the goal of “building the safest business sites by prioritizing industrial safety and health, according to the philosophy of human respect.” Samyang Holdings has established a crisis management system to ensure the safety of employees and conducts safety campaigns to inspire safety awareness.

## Implementing Safety and Health Management

### Safety and Health Management System

Samyang Holdings regards the safety of employees to be its highest priority. Samyang Holdings pursues the continual improvement of environmental and safety outcomes by selecting safety and health management as a core task for sustainable development and social responsibility and faithfully practicing these principles.

Safety accidents can directly affect workers who are exposed to the work environment, as well as local communities. Therefore, it is important to prevent such accidents proactively. Samyang Holdings has established safety and health policies and principles to ensure that employees can understand the importance of safety and health measures and increase their ability to safeguard safety and health.

### Safety and Health Governance

In accordance with the Occupational Safety and Health Act, which expands the scope of parties responsible for preventing occupational accidents to CEOs, Samyang Holdings established a company-wide safety and health management policy and reorganized its safety and health management organization. The safety and health management organization is comprised of the CEO, Occupational Safety and Health Committee, and Safety and Health Council to manage the safety and health governance of Samyang Holdings, including the employees of Samyang Holdings and business partners. The Occupational Safety and Health Committee strives to maintain and enhance the safety and health of employees by preventing occupational safety accidents and creating a pleasant work environment. The Safety and Health Council discusses safety and health measures necessary for preventing occupational accidents among workers of contractors and related contractees.

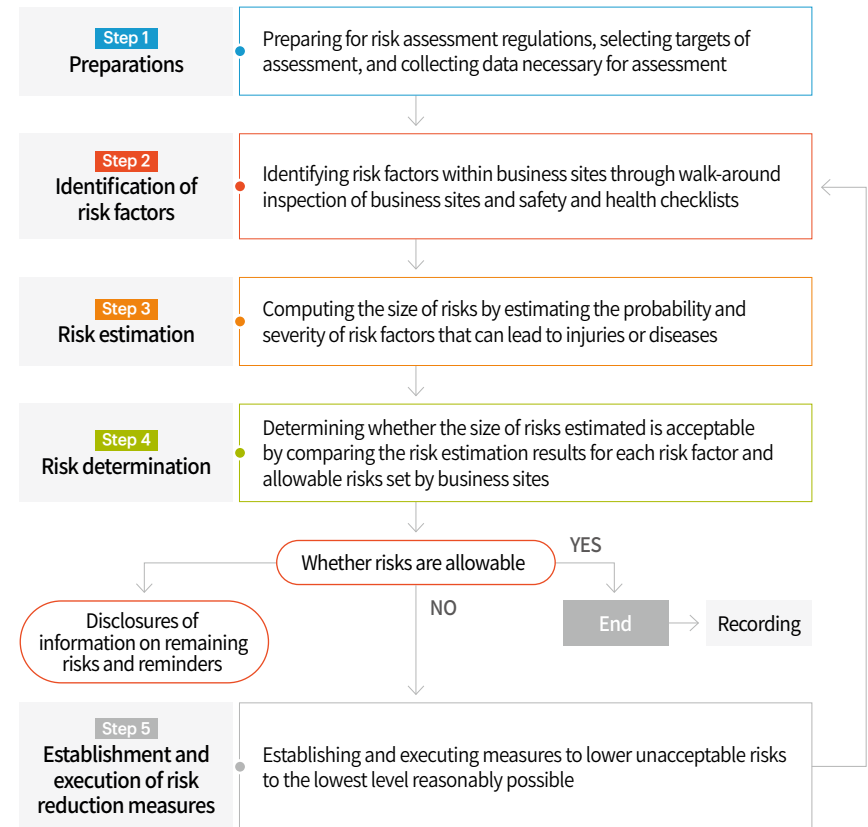

Safety and Health Management Guideline

### Safety and Health Management Organization

### Safety and Health Management Implementation Process

**Safety and Health Management Regulations**

Samyang Holdings conducts inspections according to safety and health management regulations to identify safety status and issues in real time. Every year, Samyang Holdings establishes safety and health goals and performs evaluations based on safety and health management regulations.

**Safety and Health Management Regulations**

<p><b>Safety and Health Management System</b></p> <p>Appointment of the Safety and Health Officer, supervisors, and safety and health managers</p>	<p><b>Safety and Health Education</b></p> <ul style="list-style-type: none"> <li>- OJT : Officer, safety and health managers</li> <li>- Business education : Education for supervisors, regular education for workers, education for new employees, and education upon change of duties</li> </ul>

**Strengthening Safety and Health Management Activities**

Samyang Holdings aims to make its business sites safe by establishing compliance obligations for executives, to strengthen safety and health management activities and observe the Serious Accidents Punishment Act. Samyang Holdings endeavors to strengthen prevention activities, improve safety awareness, and strengthen responsible management to ensure the safety and health of employees. In-house manuals have been prepared to manage and supervise safety and health at business sites. Details related to safety and health are periodically reported to the CEO, and the CEO performs spot checks on business sites to confirm that compliance obligations are being met.

**Safety and Health Management Activities**

Safety and health inspection by the CEO

## Managing Crises at Business Sites

### Crisis Management System

Samyang Holdings prevents critical crises from turning into reality and establishes response and recovery measures to minimize the impact of crises.

#### Purposes of Establishing Crisis Management System

- 1 To protect the life and safety of employees and business partners
- 2 To protect properties, such as facilities, information, and reputation
- 3 To secure the trust of stakeholders, including customers and shareholders
- 4 To increase the crisis response capabilities of employees and business partners and foster a crisis management culture

#### Crisis Management Organization

Samyang Holdings formed an organization tasked with deciding appropriate response methods, directly responding to different types of crises, and reducing and removing risk factors by engaging in crisis prevention activities.

#### Crisis Management Organization

#### Crisis Response Manual

Samyang Holdings minimizes damage from accidents by determining the requirements for crisis response procedures that can be applied in the event of accidents and taking adequate and effective measures.

Samyang Holdings established its principles based on the following matters. The response measures are divided into three steps : the receipt of the report and dissemination of information on the situation; the judgment of the situation and emergency response; and the operation of the company-wide organization and exit. The Crisis Response Procedure is prepared to include minimal items required for each step.

- 1 Our priority goal is to protect the lives of employees and stakeholders.
- 2 We establish the crisis response procedure for each key risk factor derived after risk assessment.
- 3 We clarify the roles and responsibilities of the crisis response organization.
- 4 The Procedure is written clearly and concisely to be accessible to all workers.
- 5 The Crisis Response Procedure is prepared as a document and furnished in a place easily accessible to all workers.

#### Work-related Injuries and Diseases

### Inspecting the Crisis Response Status at Business Sites

Samyang Holdings maintains the crisis management system by conducting status diagnoses, education, training, evaluations, document management, management reviews, and improvement activities as means to assess and continually improve the appropriateness and effectiveness of the crisis management system established at business sites. The primary purposes of maintaining and inspecting the crisis management system are as follows.

#### Primary Purposes

#### Execution System

### CASE STUDY

#### Samyang Holdings Biopharm Group

#### Raising PSM Level

The Pharmaceutical Plant of Samyang Holdings Biopharm Group was evaluated for its level of Process Safety Management (PSM) implementation status by the Ministry of Employment and Labor and achieved an improvement from M+ Grade to S Grade. The PSM evaluation, an official government system that was introduced in 1996, evaluates business sites with hazardous or dangerous equipment according to relevant laws to prevent serious industrial accidents caused by fire and explosions. PSM grades are classified into four levels (P, S, M+, M) based on the implementation status, and the Pharmaceutical Plant of Samyang Holdings received the S Grade for its excellent safety level based on its field inspection, process safety data, process risk evaluation documentation, safe operation, and emergency action plan.

Pharmaceutical Plant of Samyang Holdings

#### Samyang Innochem

#### Sustained a Zero Accident Record Extending Three Times Beyond the Standard Goal

Samyang Innochem of Samyang Group received a certificate and plaque from the Korea Industrial Safety Association for sustaining a record of zero accidents three times beyond the standard goal. Samyang Innochem maintained the accident-free record for 1,430 days, from January 8, 2017 to December 8, 2020. All employees participated in the efforts to prevent industrial accidents and promote the zero-accident movement.

Citation from the Minister of Labor for contribution to preventing industrial accidents

## Safety and Health Education and Activities

### Safety and Health Education

Samyang Holdings educates its employees on safety and health to prevent safety accidents by raising safety awareness and cultivating management capabilities. Upon the recruitment of workers and change of duties, Samyang Holdings conducts safety and health education related to the duties. Workers at business sites receive regular safety and health education.

#### Safety and Health Education Status

Course	Targets of Education	Hours of Education	
A. Regular education	Office workers	3 hours or more each quarter	
	Non-office workers	Workers who directly engage in sales	3 hours or more each quarter
		Workers who do not directly engage in sales	6 hours or more each quarter
	Persons in supervisory positions	16 hours or more each year	
B. Education upon recruitment	Day laborers	1 hour or more	
	Non-day laborers	8 hours or more	
C. Education upon change of duties	Day laborers	1 hour or more	
	Non-day laborers	2 hours or more	
D. Special education	Day laborers who are subject to special safety and health education	2 hours or more	
	Non-day laborers who are subject to special safety and health education	- 16 hours or more (4 hours or more before starting work and 12 hours divided into multiple sessions over the course of 3 months) - 2 hours or more for short-term work or intermittent work	

#### Safety and Health Education Status

Division	Unit	2019	2020	2021
Total hours of education	Hours	5,386	5,535	5,443
Number of persons who completed education	Persons	228	240	238

### Safety and Health Activities

Samyang Holdings prevents industrial accidents by establishing safety and health standards for business sites through various safety campaigns, such as the Safety Campaign Slogan Contest and One Point Lesson. In addition, Samyang Holdings shares examples of similar accidents within the same industry and provides education on preventing accidents each season.

Samyang Holdings establishes and operates the Safety and Health Guidelines while complying with the requirements of the Occupational Safety and Health Act. Samyang Holdings received a plaque of appreciation from the Chairman of the Korea Industrial Safety Association. In 2020, Samyang Holdings received a citation from the Minister of Labor for its contribution to preventing industrial accidents.

Safety and health campaign at MD Plant

Received a plaque of appreciation from the Chairman of the Korea Industrial Safety Association

COVID-19 response photos

## Responding to the COVID-19 Pandemic

Samyang Holdings established efficient and powerful response strategies to prudently overcome the challenges of the COVID-19 pandemic. In addition, Samyang Holdings operates an emergency action organization to implement response strategies to ensure agile and systematic responses. Samyang Holdings takes proactive measures to block the inflow and spread of COVID-19 in the workplace. All persons entering and leaving buildings must have their body temperature checked and wear masks at all times. In addition to such personal quarantine rules, Samyang Holdings builds safe business sites by strictly abiding with social distancing guidelines, such as periodic disinfection, staggering of the operating hours of the in-house cafeteria and increasing working-from-home. With these response strategies and exemplary practices by employees, Samyang Holdings will overcome the COVID-19 crisis and become a company that fulfills its social responsibilities through safety and health activities as needed by business partners and local communities.

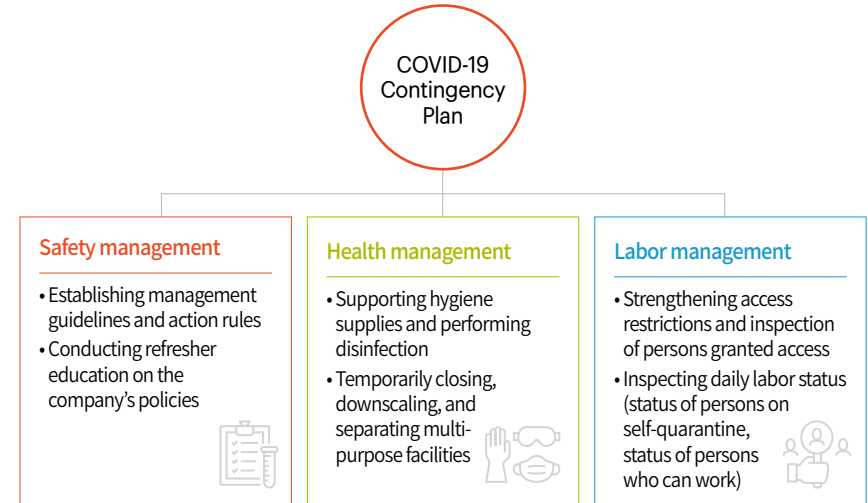

## COVID-19 Response Activities

Samyang Holdings drew up a COVID-19 Contingency Plan to inform all members of the company of the communication system and emergency response process and continually shared its response activities and status of confirmed cases with employees.

### Major Response Measures

- 1) Drawing up the COVID-19 Contingency Plan to update and share information periodically
- 2) Conducting refresher education on the company's policies, such as COVID-19 management guidelines, action rules when symptoms occur, and definition of close contacts
- 3) Strengthening access restrictions and inspection of persons given access
- 4) Supporting hygiene supplies and performing disinfection
- 5) Temporarily closing, downscaling, and separating multi-purpose facilities
- 6) Inspecting daily labor status (status of persons on self-quarantine, status of persons who can work)

# Guaranteeing Product Quality and Safety

Samyang Holdings is growing into a company trusted by customers by continually researching and developing drugs and medical devices that enhance health and enrich life quality. Samyang Holdings strives to provide safe products to customers by applying an internal quality management system.

## Improving Product Quality

### The Quality Management System of Samyang Holdings Biopharm

Samyang Holdings annually reviews the overall suitability of its quality system with the participation of executives responsible for implementing the quality system, heads of related departments, and other persons deemed as necessary by the Quality Manager. By evaluating the quality system, Samyang Holdings guarantees that details of the quality system are supplemented and maintained adequately and implemented efficiently.

PCL Filler, Lafullen

In 2015, Samyang Holdings Biopharm Group began developing Lafullen, a filler product for facial plastic surgery, and acquired approval from the Ministry of Food and Drug Safety in 2021. Lafullen uses PCL, a biodegradable polymer substance for medical uses, as the active ingredient and applies Samyang Even Porous (SEP) Technology to maintain more natural and improved facial volume compared to existing PCL-based products.

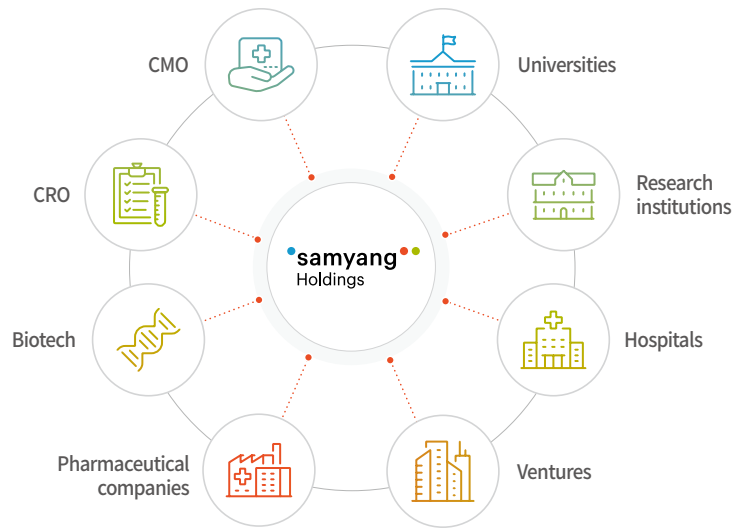

Lafullen

## Innovating Product Quality

### Product Quality Innovation System (Open Innovation)

The Biopharmaceutical R&D Center of Samyang Holdings prepared a platform to develop innovative products by cooperating on Open Innovation. Through Open Innovation, Samyang Holdings constructs various cooperation models, such as the discovery of innovative technologies, joint research, consignment research, technology transfers, investments, joint ventures, and M&A, and improves its research capabilities. Based on the improved research capabilities, Samyang Holdings enhances the quality of its products.

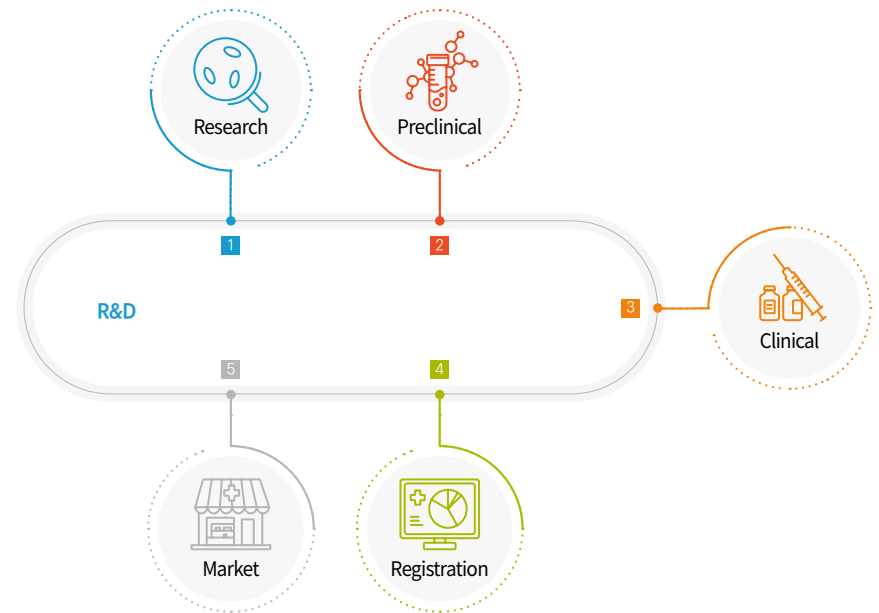

### Activities to Innovate Product Quality

Samyang Holdings Biopharm Group invested approximately 20% of annual sales into R&D and successfully invented innovative products. Samyang Holdings commercialized an anticancer drug using a chemically synthesized nano polymer called DDS, which is rarely found worldwide. The Transdermal Drug Delivery System (TDDS), a technology that delivers drugs through the skin, was applied to develop many patch products that are safe and effective, such as pain relief patches for cancer patients, smoking cessation patches, and anti-inflammatory patches.

In the field of Active Pharmaceutical Ingredients (APIs), Samyang Holdings succeeded in mass-producing Paclitaxel API used in anticancer drugs for the first time in the world using the plant cell culturing method. Recently, Samyang Holdings has been concentrating on developing innovative DDS technologies that deliver nucleic acid drugs, such as siRNA, mRNA, and pDNA. Such innovative DDS technologies will present new opportunities in areas such as anticancer immunotherapy drugs, monoclonal antibodies, antibody-drug conjugates (ADCs), and recombinant proteins. In the field of medical devices, Samyang Holdings utilizes its accumulated biodegradable materials and finished medical device manufacturing technologies to develop wound care and laparoscopic wound closure products. Furthermore, Samyang Holdings strives to develop highly functional and value-added medical devices by expanding its scope of research to 3D materials and cosmetic surgery markets.

In addition, Samyang Holdings operates and supports the “Innovative New Drug Salon” to exchange information about the bio-industry and strengthen its networking with bio-venture companies. The “Innovative New Drug Salon” is a program in which experts in R&D, patents, approval, and business development, professors, students, entrepreneurs-to-be, and journalists exchange information about various themes related to innovative new drugs.

### Croquis Based on Biodegradable Suture Technologies

Samyang Holdings Biopharm Group entered the plastic surgery market by releasing “Croquis” in 2020, based on its biodegradable suture technologies accumulated over the course of around 25 years. Developed to target overseas markets, Samyang Holdings has presented global case studies and research outcomes regarding “Croquis” and has demonstrated its effectiveness and safety through data.

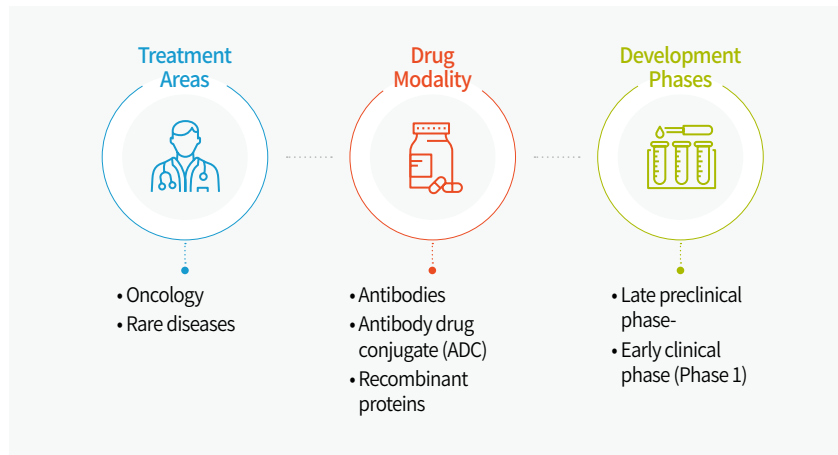

Croquis

## Managing Product Safety

### Importance of Managing the Safety of Bio Products

The bioindustry is an industry with strong ties to public welfare, linked to the stability of customers, and therefore strict government regulations apply. Accordingly, bio companies must carry out clinical studies while observing the regulations and standards of different countries and must prepare for approval, production, and sale. In South Korea, the standards set by the Ministry of Food and Drug Safety must be observed. The Guidelines of the Food and Drug Administration (FDA) are followed in the United States, the European Medicine Agency (EMA) in Europe, the Pharmaceuticals and Medical Devices Agency (PMDA) in Japan, and the National Medical Products Administration (NMPA) in China. In addition, production processes and quality management affairs are inspected, managed, and supervised periodically by regulatory agencies after obtaining approval.

Companies are obliged to provide highly safe products to customers. Accordingly, Samyang Holdings conducts clinical studies, prepares and executes the sales approval procedure according to the guidelines of each regulatory agency, and submits product safety and quality data to each regulatory agency. In addition, Samyang Holdings operates a unique quality management system to ensure the safety of products by collecting and monitoring product safety information.

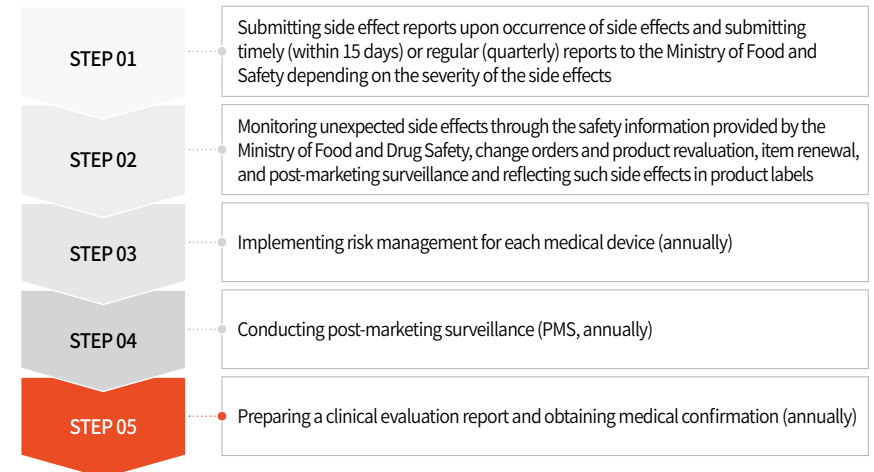

### Methods of Managing Product Safety

Companies must provide highly safe products to customers in order to subsist and grow sustainably. Samyang Holdings Biopharm Group manages quality in the development, production, storage, and distribution stages to provide safe products to consumers. In addition, the pharmacovigilance system collects and monitors product safety information throughout the pharmaceutical lifecycle, from pharmaceutical development to post-marketing safety management. As a part of the quality management system, adverse events related to the use of all products sold in the market are reported to regulatory agencies and collected through various means, including literature searches and clinical research. The collected safety information undergoes pharmaceutical analysis to conduct a benefit-risk assessment on the pharmaceuticals and improve quality.

Samyang Holdings observes pharmacovigilance and fulfills the reporting obligations of global regulatory agencies regarding pharmacovigilance activities. Employees are informed of adverse events and disclosure obligations and they are educated periodically. In this manner, Samyang Holdings manages safety based on an organized management system. Samyang Holdings will continue to provide better products to customers by ensuring the safe use of pharmaceuticals and preventing potential hazards.

### System for Monitoring Side Effects and Safety Information and the Management Process

## Product Safety Management Activities for Each Production Process

### Managing the Safety of Clinical Studies

Samyang Holdings Biopharm Group maintains the SOP List, which is a management process to guarantee quality and safety for patients and participants of clinical studies. There was no FDA-sponsored inspection related to clinical studies and pharmacovigilance that induces Voluntary Action Indicated (VAI) and Official Action Indicated (OAI), and Samyang Holdings has not incurred any monetary loss from legal procedures related to clinical studies in developing countries.

### Managing the Safety of Drugs

Samyang Holdings Biopharm Group secures the safety of products by implementing its quality management system. Products of Samyang Holdings are not listed in the MedWatch pharmaceutical safety alert database of the FDA, and no FDA actions were taken against violations of the current Good Manufacturing Practice (cGMP). In addition, none of our products have been recalled or approved for recall, reuse, or disposal for safety reasons, and no deaths occurred in relation to our products to be reported to the FDA adverse event reporting system.

### Responsible Marketing and Anti-forgery

Samyang Holdings Biopharm Group attaches standard codes and serial numbers to each product to maintain the traceability of products throughout the supply chain. Product forgery is prevented by tracking the supply of products in the distribution stage (pharmaceutical manufacturer, wholesaler, hospital, patient). Samyang Holdings performs marketing and labeling in accordance with the Pharmaceutical Affairs Act and Medical Devices Act. Off-label activities are carried out on anticancer therapies that exceed the allowable limit announced by the Health Insurance Review and Assessment Service and products that are not acknowledged for insurance benefits. Samyang Holdings practices ethical marketing activities, and there have been no monetary losses caused by legal procedures related to false marketing claims, corruption, and bribery.

## Enhancing Customer Satisfaction

### Customer Satisfaction for Quality

Samyang Holdings stands strongly alongside its customers to provide abundance and convenience in everyday life. Aiming to offer satisfaction through products used in daily lives, Samyang Holdings manages customer satisfaction through its monitoring system for side effects and safety information, management status updates, responses to customer complaints, and customer management system.

### Responding to Customer Complaints

Samyang Holdings systematically manages the entire process of customer complaints from the point at which it becomes aware of this complaint to point of final solution. Data collected from customers are used to resolve complaints quickly and prevent the recurrence of complaints.

- ① Reviewing the necessity of change in approval and responding to approval changes based on customer complaints
- ② Reporting recall measures to the Ministry of Food and Drug Safety when a quality issue that requires recall arises
- ③ Conducting on-site sales activities
- ④ Operating a customer complaint response manual

### Customer Complaint Response Process

### Managing Customers

After receiving customer inquiries via its website, Samyang Holdings handles the inquiries by assigning persons in charge. Customer information, inquiries, and details of the handling process are registered in a database for continual management.

# Promoting Social Contribution Activities

Samyang Group

Samyang Group actively engages in social contribution activities to foster talents, preserve the environment, and promote health. Samyang's efforts to make lives abundant and convenient will reach beyond the corporate boundary to benefit the broader community.

## Social Contribution Activities of Samyang Group

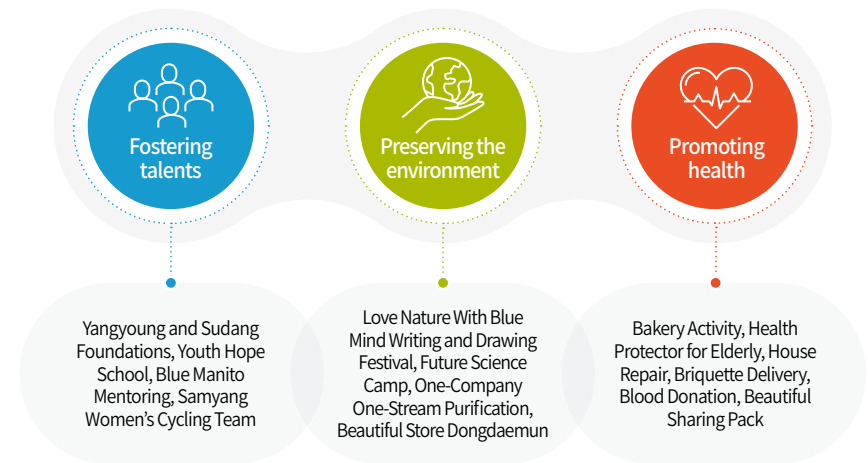

Samyang develops various social contribution activities to offer opportunities to make dreams come true.

According to the management philosophy of Sudang Kim Yeon-Su, who believed that "Corporations should not remain in leagues of their own in which they merely pursue their own interests, but rather should have a historical sense of calling for the country and society as a whole and take on the responsibility for contributing to national prosperity," Samyang Group has dedicated its utmost efforts to fulfill its corporate social responsibility ever since its foundation.

Currently, guided by the vision of becoming an "Ingredients that Add Value to Life," Samyang Group engages in social contribution activities centered on fostering talents, preserving the environment, and promoting health to offer opportunities for creating new values despite challenges in the environment.

The scholarship program has a long tradition and represents Samyang Group's dedication to fostering talents and fulfilling its corporate social responsibility. This program is administered by the Yangyoung Foundation and the Sudang Foundation. Samyang Group has formed and is sponsoring a female cycling team, a non-popular sporting event, to contribute to training talented athletes.

The Love Nature With Blue Mind Writing and Drawing Festival hosted by the company promotes the protection of clean nature, which provides the fundamental habitat for human beings. Approximately 10,000 students and parents participate in this festival each year. Samyang also holds volunteer activities involving employees and their families to help neglected neighbors.

### Social Contribution Expenses

<b>Total</b>	<b>KRW million</b>	<b>4,993</b>	<b>5,045</b>	<b>5,174</b>

(\*) Scholarship foundations : Dividends and contributions from Yangyoung and Sudang Foundations

## Introducing Social Foundations

### Introducing Foundations

The Yangyoung Foundation and Sudang Foundation are public corporations that aim to foster talent. The Yangyoung Foundation was founded by Chairman Sudang Kim Yeon-Su of Samyang Corporation in 1938 as Korea's first private scholarship foundation. Sudang Foundation was founded in 1968 by Sudang Kim Yeon-Su and his three children, Kim Sang-hong, Kim Sang-ha, and Kim Sang-eung, to expand the scholarship program. Later, affiliates of Samyang Group, including Samyang Holdings, Samyang Corporation, and Samnam Petrochemical, joined the fundraising efforts. Despite challenging conditions, the Yangyoung and Sudang Foundations provide scholarships to exemplary students each year and support the research expenses of teaching and research organizations. In particular, the Sudang Foundation operates the Sudang Awards to encourage those who contribute to the advancement of academic and technical fields in South Korea.

#### Yangyoung Foundation

The Yangyoung Foundation, the first private scholarship foundation in Korea, awards scholarships to around 80 undergraduates each year and supports the research expenses of professors in the humanities and natural sciences.

#### Scholarship and Support Outcomes (1939-2021)

(Unit of amount : KRW million)

Division	Scholarship	Research Expenses	Academic Support
Number of recipients	23,111 persons	802 persons	172 cases
Amount	23,244	5,371	2,293

\* Outcomes in 2021 : Total of KRW 1,590 million, including scholarship grants of KRW 835 million, research expense grants of KRW 340 million, and Sudang Awards of KRW 200 million

#### Sudang Foundation

The Sudang Foundation offers scholarships to around 20 undergraduates and 60 high school students every year and supports various academic activities.

#### Scholarship and Support Outcomes (1968-2021)

(Unit of amount : KRW million)

Division	Scholarship (Middle and High Schools)	Scholarship (Universities)	Research Expenses	Academic Support	Educational Institutions
Number of recipients	11,228 persons	2,350 persons	232 persons	38 cases	1 case
Amount	2,859	5,070	1,428	370	132

## Introducing the Sudang Awards

The Sudang Awards was introduced to encourage people who make outstanding contributions to developing the nation and society, in keeping with the spirit of Sudang Kim Yeon-Su, the founder of Samyang Group, who was dedicated to fostering national prosperity and talent. The Sudang Awards was started by the Kyungbang Scholarship Society in 1973, and continued in the form of Sudang Science Awards, which was granted 14 times up to 1986. The Sudang Foundation took over the Sudang Science Awards and expanded the scope to include the natural sciences and humanities. In 2006, the Sudang Science Awards was reorganized as the 15th Sudang Awards. Currently, the Sudang Awards committee receives recommendations for candidates in three categories, including basic sciences, applied sciences, and humanities, and selects two researchers with outstanding achievements to receive prize money of KRW 200 million and a plaque. Sudang Foundation has organized the Sudang Awards Steering Committee, composed of renowned social figures, to increase the fairness and expertise in the administration of the Sudang Awards.

## Fostering Talents

### Fostering Promising Bakers at Youth Hope School

Samyang Group operates a program that fosters promising bakers among students at Youth Hope School as a part of its range of programs supporting the career development of youths. Students produce various bakery goods with professional cooking instructors of the Q.one Cooking Class to explore and develop their aptitudes.

(This program was suspended in 2021 due to the COVID-19 pandemic.)

### Blue Manito Mentoring by the Youth Hope Foundation

Samyang Group sponsors the Youth Hope Foundation, a public foundation under the Ministry of Justice, to support the proper growth of youths. Employees of the Group participate in the Blue Manito Program of the Youth Hope Foundation as mentors. Blue Manito is a one-on-one mentoring program for juveniles who are sentenced to conditional suspension of indictment.

### Samyang Women's Cycling Team

Samyang Group formed its women's cycling team in 1986, when cycling was a less-known sporting event in Korea. It has consistently sponsored the team and contributed to developing non-popular sports. The Samyang Women's Cycling Team produced numerous members of the South Korean national team and set a new national record, infusing vital energy into the stagnant field of Korean women's cycling.

## Protecting Local Communities

### Love Nature With Blue Mind : Writing and Drawing Festival

Samyang Group and Huvis held the "23rd Love Nature With Blue Mind : Online Writing and Drawing Festival" for students attending elementary and middle schools in the Jeollabuk-do and Jeonju regions. The "Love Nature With Blue Mind : Writing and Drawing Festival" is an event jointly hosted by Huvis, a company specializing in chemical fiber materials, with affiliates of Samyang Group including Samyang Corporation and Samyang Kasei. Since its inception in 1996, around 10,000 students and parents have participated in making this event a representative environmental festival of Jeollabuk-do Province and a nationwide environmental event. This festival was held around May every year at Huvis Jeonju Plant 1 before the COVID-19 pandemic, but was converted into an online format in 2021 due to the COVID-19 pandemic.

### Bread Full of Love : Bakery Activity

Employees of Samyang Group and their families and friends participate in a bakery activity, which involves baking bread using products sponsored by Samyang Corporation, such as Q.one flour and processed fat, and delivering the baked bread to neighbors in need. Samyang Group practices love for neighbors by handing out bread to neighbors in need, such as seniors who live alone, children raised by grandparents, and multicultural families.

(This program was suspended in 2021 due to the COVID-19 pandemic.)

### Health Protector for the Elderly With Rheumastop

Samyang Group engages programs to safeguard the health of senior citizens using Rheumastop, an arthritis medicine of Samyang Holdings Biopharm Group. Samyang Group donates Rheumastop to keep low-income seniors at welfare centers healthy and conducts volunteer activities to help their daily lives.

(This program was suspended in 2021 due to the COVID-19 pandemic.)

### House Repair, Briquette Delivery, and Blood Donation

Samyang Group conducts a House Repair and Briquette Delivery program to help neighbors in need improve their residential environment and meet their wintering needs. Employees of the Group participate in these volunteer activities to share their warmth with neighbors. Samyang Group also takes part in the Blood Donation Movement to keep neighbors healthy.

## CASE STUDY

### Samyang Group

#### Overcoming Social Crises through Responses to the COVID-19 Pandemic

In the early stage of the COVID-19 pandemic, Samyang Group donated money and supplies worth KRW 150 million to the Republic of Korea National Red Cross. The donated fund was raised jointly by Samyang Corporation, an affiliate for food and chemical materials, and Samyang Packaging, an affiliate for the packaging business. Samyang Holdings Biopharm Group, a biopharmaceutical affiliate, donated supplies of its Rheumastop Patch, an arthritis patch, worth KRW 25 million. Samyang Corporation donated supplies of Q.one Homemade Mix worth KRW 25 million. In addition, Samyang Group donated 50 contact-free thermometers, the demand for which has sharply increased at medical sites, to the Keimyung University Daegu Dongsan Hospital, the regional hub hospital for COVID-19 treatment.

Regional business sites fulfilled their responsibility as members of local communities to overcome the challenges of the COVID-19 pandemic. Samyang Packaging, a company with major business sites in Jincheon-gun and Daejeon, donated food products to the Daedeok-gu Volunteer Center. Samyang Packaging drew public attention with its Drive-Thru donation, directly delivering donated supplies using vehicles, to help maintain social distancing. Yeosu Plant of Samnam Petrochemical raised funds donated by employees and gave KRW 10 million to the Munsu Social Welfare Center in Yeosu.

Samyang Corporation showed its support for consumers who practice social distancing by uploading “Wise Home Life With Q.one Homemade” videos about making new desserts using Q.one Homemade Mix on its YouTube channel and social media. In addition, ServeQ, a food ingredients distribution brand, supported small business owners and startups experiencing hardships due to the pandemic by conducting webinars on food menu development.

### Samyang Group

#### Donated KRW 300 Million to the Community Chest of Korea

Samyang Group donated KRW 300 million to the Community Chest of Korea. Samyang Holdings, Samyang Packaging, and Samyang Innochem contributed KRW 100 million to this donation, and the donated funds will be used to support the basic livelihood of neglected neighbors, improve their residential environment, and provide essential medical expenses. Samyang Group has been donating neighbor funds to the Community Chest of Korea every year since 2001.

### Samyang Group

#### Scholarships for 2021 Delivered by the Yangyoung and Sudang Foundations

The Yangyoung and Sudang Foundations of Samyang Group awarded scholarships for 2021 to 88 undergraduates and graduate students in South Korea. Yangyoung Foundation supported 77 undergraduates and graduate students, and Sudang Foundation supported 11 undergraduates. They provided KRW 833 million to the 88 recipients. Scholarships are provided for up to four semesters, and Samyang has been offering additional learning stipends in addition to tuition fees since 2021 to help students fully concentrate on their studies. The recipients were exemplary students selected through recommendations from schools, who have shown outstanding academic performance despite difficult conditions.

### Samyang Group

#### Hosting of the 30th Sudang Awards Ceremony

The Sudang Foundation of Samyang Group hosted the ceremony for the 30th Sudang Awards at Lotte Hotel in Sogong-dong, Seoul, on May 3, 2021. Both of the two winners of this year's Sudang Awards were selected in the applied science category : the recipients were Kim Jang-Ju, an honorary professor of material engineering at Seoul National University, and Seong Yeong-Eun, a professor of chemical and biological engineering at Seoul National University. The recipients received prize money of KRW 200 million and a plaque at the award ceremony. The Sudang Awards was established to fulfill the spirit of Sudang Kim Yeon-Su, who was dedicated to fostering talent, and annually selects and awards researchers who contribute to the academic advancement of Korea.

30th Sudang Awards Ceremony

### Samnam Petrochemical

#### Honored with a Plaque of Recognition as a 2021 Social Contribution Company

The Yeosu Plant of Samnam Petrochemical was acknowledged for its social contribution at the Korea National Sharing Awards. Due to COVID-19 social distancing, the award was delivered to each recipient site. The social contribution acknowledgment is an event jointly hosted by the Ministry of Health and Welfare and the Korea National Council on Social Welfare to identify and honor organizations, companies, and individuals that practice sharing, based on the evaluation of public projects. The Yeosu Plant of Samnam Petrochemical has solidified into a company that grows alongside residents, through its sharing and volunteer services.

# Strengthening Information Security

Samyang Group

Samyang Holdings implements various information security policies and systems to protect personal information. Samyang Holdings enhances physical security and raises security consciousness after identifying information risks and strives to protect the information of the organization and customers against threats.

## Information Security System

### Personal Information Protection System and Rules

Samyang Group has established its privacy policy and guidelines to improve the safety and reliability of organizational and customer information and systematically maintain information protection. Samyang Group distributes its information security policy, which includes its privacy policy, among all employees to guide their practices.

### Personal Information Management Organization

The organization in charge of personal information protection consists of the General Group Officer, officers and managers of each group company, and the heads of departments and persons handling personal information. Officers and managers supervise personal information to ensure it is handled safely according to the privacy policy and guidelines.

### Personal Information Processing System

Samyang Group operates a well-structured database system and an application system to process personal information. The personal information processing system is protected by authentication, access control, menu and screen display, encryption, and log management. The personal information processing system annually inspects the list of systems, personal information collected and processed by each system, system administrators, supervising departments, and personal information possessed by each system.

### Personal Information Protection Rules

#### Information Protection Action Rules

- 1 Using authorized and genuine software programs
- 2 Prohibiting access to websites that use personal information when using the Internet in a public place
- 3 Turning PCs off once a day and turning power off when not using PCs
- 4 Recommending password setting

#### Personal Information Handling Rules

- 1 Acquiring consent when collecting and using personal information
- 2 Separately managing the safety of stored personal information to prevent access by unauthorized persons
- 3 Completely and irrecoverably destroying personal information after use
- 4 Not storing personal information, such as resident registration numbers, credit card numbers, and bank account numbers, on PCs
- 5 Deleting personal information when changing PCs and mobile phones
- 6 Immediately reporting any personal information leakage accident to the information protection organization

#### Preventing Ransomware Infections

- 1 Deleting emails with suspicious sources or attachments without opening
- 2 Keeping operating systems and work software programs up-to-date
- 3 Regularly backing up data not stored in central storage spaces (safe space)
- 4 Being cautious about sharing PCs or folders (to be shared with the minimal number of parties)
- 5 Blocking network connections and reporting infections to the information protection organization to prevent their spread

**Information Protection Organization**

**Information Protection Organization**

The information protection organization of Samyang Group was formed as a part of the Group's information protection policy to abide by related laws (Act on Promotion of Information and Communications Network Utilization and Information Protection, etc. and Personal Information Protection Act). The information protection manager generally manages practical information protection duties and assists the Chief Information Security Officer (CISO). The CISO supervises the information protection duties of the company and assists the CEO.

**Major Information Protection Duties**

The information protection organization executes major information protection duties according to the managerial, technical, and physical aspects of the Group's information security system.

Technical aspects

**Supplementing technical vulnerabilities**

- Supplementing vulnerabilities in servers, networks, DBs, and security systems
- Supplementing vulnerabilities in web and mobile apps

Managerial aspects

**Revising policies and guidelines**

- Approving, announcing, and spreading the revision of policies and guidelines
- Revising the internal accounting management system to reflect the ITGC

**Raising security awareness among employees**

- Implementing mock training on APT email phishing for employees
- Conducting security education and collecting security pledges

Physical aspects

**Executing physical protection activities**

- Designating security zones
- Controlling access
- Installing and operating CCTVs

**The Security Accident Reporting Process of the Group**

When personal information violations or security violations occur, Samyang Group analyzes the course and cause of reported matters received by the person in charge of information protection and reports details to the information protection manager and CISO.

**Personal Information Violations and Complaints Regarding Loss of Customer Information**

Samyang Group is subject to the operation of the personal information processing system. From 2019 to 2021, Samyang Group received no claims about personal information violations from customers or security accidents that resulted in the loss of customer information.

**Information Security Data**

Division	Unit	2019	2020	2021
Activities to improve cyber security awareness	Cases	1	2	2
Hours of cyber security education per person	Minutes	14	30	30
Number of complaints received in relation to personal information violations	Cases	0	0	0
Total number of customer information leaks, thefts, and losses confirmed	Cases	0	0	0

## Raising Information Security Awareness

### Identifying Information Security Risks

As Internet services grow, cyberattacks such as hacking and ransomware are becoming increasingly frequent. There is an increasing risk of confidential emails being leaked, on purpose or by mistake. In addition, the importance of information security has grown due to crimes that misuse personal information. To counter the increasing leakage risk of internal personal information and business data, Samyang Group identifies and responds to external and internal risks.

#### Methods of Responding to Information Security Risks

Samyang Group introduced physical security solutions in response to internal and external security risks. Samyang Group conducts information security education for employees to raise security consciousness.

#### | Physical Security Solutions |

Samyang Group introduced the following security systems to prevent the leakage of internal personal information and business data.

- ① Introduction of a document security system : Security of documents, including Word, Excel, and PPT
- ② Introduction of an integrated PC management system : System that manages PCs, portable storage devices, wireless networks, and illegal software programs
- ③ Introduction of an anti-spam system : Blocking spams, malicious codes, and virus emails to reduce email security threats and work inefficiencies
- ④ Advanced persistent threat (APT) solution : Solution for intelligent attacks, such as ransomware, malicious codes, DDOS, and network invasions (hacking)
- ⑤ VPN : External access to the internal network to provide a security network environment

Personal information protection education certificate

Samyang Ethics School

| Security Consciousness Solutions |

Samyang Group conducts personal information education for all employees and persons related to personal information protection at Samyang Ethics School to bolster the security mindset among employees. In addition, Samyang Group has strengthened its in-house system authorities and policies and established a policy related to business data (emails and documents).

Information Security Education Status

Mock Training and Action Principles

Samyang Group carried out mock training on email viruses to heighten the security alertness of the Group and improve its ability to respond to violations. Through the mock training, employees were educated to prevent the leakage of important information and refrain from opening emails from unknown senders. In addition, Samyang Group strengthens security awareness through its Three Major Action Principles and the information security pledge.

Group's information security pledge

Samyang Holdings

Guiding External Users

Samyang Holdings participates in the information protection announcement scheme enforced in 2022 to protect Internet users, guarantee their right to know, and contribute to revitalizing the information protection industry, in response to the increasing investment and interest in information protection. Samyang Holdings publicly announced its information protection investments, workers, certifications, and activities to improve its reliability and cyber response abilities.

Information protection announcement scheme

Three Major Security Action Principles

**1 Make sure to discard important documents that contain business information regarding the company.**

- Shred printouts that contain important information after use.
- Manage printed documents to prevent others from viewing or transporting them.

**2 Regularly clean your mailbox at least once every three months.**

- Delete unnecessary emails right away.
- Emails in inboxes should be emptied after three months.

**3 Use the official communication channel to share information.**

- Listen attentively to various news and messages about the company through the official communication channel.
- Accurately share details of meetings based on the minutes instead of spreading them discretionally.

# Evaluating Performance and Rewarding Employees for Competency Development

## Strategies for Securing and Fostering Talents

### Strategies for Securing and Fostering Talents

Samyang Holdings focuses on investing in human resources to foster talents who fulfill Samyang's values, in keeping with its HR operating principles. All employees are supported in their efforts to exhibit their capabilities, achieve self-realization, and contribute to the company's growth and sustainable development of society. Samyang Holdings builds an open corporate culture that acknowledges the diversity and skills of talents or employees.

Recruitment PR

#### Strategies for Securing Talents

The competence and passion of the employees of Samyang are the company's greatest assets and drive the future of Samyang Holdings. Accordingly, Samyang Holdings constantly identifies the needs of each organization and recruits outstanding human resources. Samyang Holdings attracts individuals who will grow along with the company by operating a scholarship system for undergraduates and graduate students every year. In addition, Samyang Holdings is reviewing proposals for experiential internship programs that link major universities with its business sites and include field trips to plants.

#### Talents Recruitment System

Samyang Holdings operates many recruitment channels to find talents, such as regular recruitment, non-regular recruitment, and industry-university cooperation program. All applicants have equal opportunities in the recruitment process and are not discriminated based on educational background, gender, and religion. In addition, Samyang Holdings began monthly recruitments in 2022 to resolve the youth unemployment problem by creating jobs. Amid the circumstance of the COVID-19 pandemic in 2021, Samyang Holdings continued its job-creating activities, such as open recruitment in the first half and second half of the year, non-regular recruitment, and job fairs. In the job fairs, online presentations and counseling sessions were held for jobseekers to find recruitment information in a safe environment, as an alternative to face-to-face events. Through job interviews, Samyang Holdings continued creating employment despite the pandemic situation by strictly abiding by quarantine rules, applying measures such as contact-free interviews, self-diagnosis using text messages, body temperature measurement, provision of masks, and social distancing in the waiting lounge and interview room.

#### Talents Fostering System

Samyang Holdings consistently identifies the needs of each organization and fosters talents. Samyang Holdings administers various programs for different job groups, including engineering, service, and design, such as introduction to Samyang, OJT, and mentoring. All employees of Samyang Holdings build their careers through the core talent fostering system and career development system. Contact-free education programs were operated after the outbreak of COVID-19 by preparing related infrastructures and capabilities. After the end of the pandemic, Samyang Holdings will expand its lecture recording studio and equipment to improve its contact-free education capabilities.

Launching ceremony of the mentoring program for new employees

## Fair Evaluation and Remuneration System

The job-based HR of Samyang Holdings manages the performance of employees by classifying performance, which are the outcomes of work, and competency, which represents the knowledge, skills, and behavioral characteristics of individuals. Competency evaluation is classified into common competency, leadership competency (for managers), and job competency to evaluate potential talents and abilities. For fair evaluation, employees are evaluated from various angles on their ability to interact and collaborate based on interim evaluation, non-regular evaluation, and feedback from coworkers. Evaluation is performed in the form of an absolute evaluation to ensure reasonability. Samyang Holdings provides reasonable remunerations to employees reflecting the relative value of jobs and performance of individuals using a job-based HR that is based on performance management and competency management.

The job-based HR of Samyang manages the performance of employees using a system that classifies performance into **achievement and competency.**

The job-based HR of Samyang offers reasonable remunerations reflecting the relative value of jobs and performance/competency of individuals.

## Operating Various Employee Benefits Systems

Samyang Holdings values the work and life balance of employees. Samyang Holdings operates an employee benefits in three major directions to enable employees to fully immerse in work during working hours and to manage stable and healthy personal lives after work.

### Supporting Stable Lives

### Supporting Healthy Lives

### Supporting Pleasant Lives

## Organizational Culture

### Samyang Group

### The Changing Organizational Culture of Samyang Group

Samyang Group conducts annual organizational activation surveys to identify areas necessary for sustainable growth and resolve problems. Organizational activation surveys diagnose the Vitality Index (VI) of Samyang and study areas for improvement. The Vitality Index is calculated by measuring the number of employees who are immersed in work. Samyang Group diagnoses the organizational culture, objectively determines group-wide improvement tasks and fosters a healthy organizational culture by actively resolving issues.

## Labor-Management Council

Samyang Holdings respects the freedom of association according to the ILO Conventions and the labor laws of the Republic of Korea. Samyang Holdings has established the Labor-Management Council Regulations to conduct activities for improving its organizational culture and handling grievances, and the Labor-Management Council is held once a quarter. Matters determined by the Labor-Management Council identically apply to all employees, and some individual matters apply to the corresponding individuals.

## Implementing Human Rights Management

Amid the spread of ESG management, companies have shown a growing interest in human rights management. Samyang Holdings annually conducts workplace bullying education, sexual harassment education, and disability awareness education for all employees, including new employees. In addition, Samyang Holdings has installed and is operating a counseling office to handle grievances.

### CASE STUDY

#### Samyang Packaging

#### Certified by the Ministry of Employment and Labor for Excellent Labor-Management Culture

Gwanghyewon Plant of Samyang Packaging received a certificate and plaque from the Daejeon Regional Ministry of Employment and Labor for excellent labor-management culture on August 13, 2021. The excellent labor-management culture certification system is a system supervised by the Ministry of Employment and Labor and the Korea Employment and Labor Service to certify and award exemplary companies that disseminate cooperative labor-management culture and demonstrate labor-management cooperation. The Gwanghyewon Plant of Samyang Packaging had the honor of being selected as a company with excellent labor-management culture through document screening and a case presentation contest.

### Grievance Handling Process

# Managing the ESG Risks of Business Partners

## Business Partner Management System

### Mutual Growth of Samyang and Business Partners to Make Lives Abundant and Convenient

In the age of Industry 4.0, characterized by the accelerating convergence of industries, factors of uncertainty have greatly increased. Companies are required to cooperate closely with their business partners for sustainable growth. Samyang Holdings has performed various roles for mutual growth, placing trust and coexistence at the center of its corporate activities. According to the principles of ethical management to “pursue co-development with business partners by creating a fair transaction culture,” Samyang Holdings will maintain fair transactions with business partners and further strengthen cooperative relationships. Based on diverse exchange activities and cooperation systems, Samyang Holdings endeavors to form long-term partnerships and promote mutual growth with business partners.

### Purchasing Organization and System

The Integrated Purchasing Office purchases all integrated purchase items of Samyang Holdings, optimizing human resources on the company level to attain its purchasing objectives. Samyang Holdings has built an organization system to ensure consistent purchasing services. The purchasing competitiveness of the company is improved by empowering the purchasing organization, and the purchasing process has been computerized for quick and efficient processing. The personnel refer to the operation manual for details about providing information to suppliers, participating in biddings, purchase orders, and payment settlement. All data, such as transaction history, are stored on the TOPS, ERP, or documents. The Integrated Purchasing Office discovers and fosters strategic business partners that have the potential and competitiveness to grow mutually with each affiliate. In addition, Samyang Holdings abides by the laws and regulations in all regions where its businesses are operated and handles all duties ethically and fairly according to its Code of Ethics.

### Selecting and Managing Business Partners

The person in charge of purchasing in the Integrated Purchasing Office of Samyang Holdings selects suppliers by applying fair selection techniques, such as comprehensive evaluations, competitive biddings, field contracts, and single and exclusive supply and price-determining techniques, such as price comparison and cost analysis. The purpose is to engage in fair and transparent transactions and provide greater value to all stakeholders. Potential and new suppliers are discovered and registered in accordance with the established standard procedure, and departments or persons in charge of purchasing are prohibited from registering suppliers without complying with the standard procedure.

Samyang Holdings aims to identify outstanding new suppliers with technologies and expertise, promote long-term strategic partnerships with suppliers by performing regular performance analysis, maximize the business synergy created between Samyang Group and each supplier, and ultimately reinforce the overall competitiveness of the supply chain. Samyang Holdings performs regular performance assessments of suppliers that are transacting with the Integrated Purchasing Office according to the assessment criteria, thus forming long-term and strategic relationships.

### Business Standards

All employees related to purchasing duties must handle their duties ethically and fairly at all times, and all purchasing duties must be carried out while abiding by national laws and regulations. Since the execution of ethical duties has an important impact on the image and competitiveness of Samyang Holdings, Samyang Holdings observes its Code of Ethics, Code of Conduct, and Four Major Practices as business standards.

### Sustainable Purchasing

Samyang Holdings perceives its social, environmental, and economic responsibilities and implements its sustainable management guidelines. Samyang Holdings fulfills its social responsibility through sustainable purchases, mutual growth with stakeholders, cooperation with customers, and open management based on an open organizational culture. While pursuing environmental soundness with future-oriented, eco-friendly purchases, Samyang Holdings produces economic profits with innovative technologies and systems and creative purchasing.

# Governance

- 52 Governance Material
- 55 Ethical and Compliance Management Material
- 58 Transparent Disclosure of Information Material
- 60 Business Portfolio Diversification Material

## Why Does It Matter?

Transparent governance is essential for gaining trust from stakeholders. We must observe ethical and compliance management in order to create a transparent management environment. We must accomplish stable corporate management and protect the rights and interests of shareholders by building a sustainable management system based on transparent and sound governance.

## Material Governance

Due to the changing corporate management environment, stakeholders are diversifying, and companies are required to increase their corporate value in the long term. The Board of Directors of Samyang Holdings has directors with expertise to improve corporate value and satisfy stakeholders.

### Operating Board of Directors

#### Board of Directors

Samyang Holdings practices integrity and trust in management based on transparent and sound governance. The Board of Directors is composed of the best experts who can make comprehensive decisions with expertise and independence. The Board of Directors of Samyang Holdings maintains checks and balances to achieve stable corporate management.

#### Composition of the Board of Directors

Under the management policy to uphold integrity and trust in management, Samyang Holdings pursues the following corporate values and strives to improve the rights and interests of stakeholders, including shareholders. The Board of Directors of Samyang Holdings resolves important matters regulated by laws or articles of association, matters entrusted at the general meeting of shareholders, and matters related to the basic

management guidelines and business management principles of the company. The Board of Directors also supervises the duties of the management.

The Board of Directors is the highest decision-making body of the company that has the authority to appoint the CEO. The majority of the Board is comprised of external directors to ensure they are independent of the management and dominant shareholders. As of the end of March 2022, the Board of Directors had seven directors, including three internal directors and four external directors. Samyang Holdings operates the External Director Candidate Recommendation Committee to safeguard the independence and fairness of the candidate recommendation and appointment processes. The External Director Candidate Recommendation Committee selects persons qualified by relevant laws based on internal regulations and recommends candidates for external directors who are in the best interests of the company and shareholders, after reviewing their independence from the company and the largest shareholder and their professional capabilities for directing global enterprises. Three external directors were appointed by the External Director Candidate Recommendation Committee in 2022.

### Independence of Directors

The Board of Directors is the highest decision-making body that resolves the major management affairs of the company. The company endeavors to ensure that the Board of Directors can supervise the management and make efficient decisions according to the articles of association. The Chair of the Board of Directors is separated from the CEO to ensure the independence of the Board of Directors. The majority of the Board of Directors is comprised external directors for effective supervision of management, and decisions are made independently from the management and dominant shareholder to represent various stakeholders and supervise major pending issues. The Board of Directors appoints the Chair in accordance with the BoD Regulations, and external directors are elected from among experts in different areas through a fair and reasonable procedure. The persons who are appointed Directors do not have direct interest relations with the company and have the expertise, independence, and transparency as prescribed by the External Director Candidate Recommendation Committee Regulations. They are guaranteed with a three-year term and independent execution of duties.

### Strengthening and Supporting the Expertise of Directors

Samyang Holdings secures the expertise of the Board of Directors by appointing directors who have professional knowledge in different areas, such as law, finance, and management. Directors receive professional education on aptitude and competency so they can contribute to the long-term growth and development of the company. Their expertise is further improved by seminars and educational opportunities provided by external experts.

## Committees Under the Board of Directors

Samyang Holdings has installed and is operating the Audit Committee and External Director Candidate Recommendation Committee under the Board of Directors to increase the expertise and efficiency of the Board of Directors. The Audit Committee is entirely composed of external directors, and the External Director Candidate Recommendation Committee is comprised of four directors, including one internal director and three external directors. These committees have secured the independence and transparency of decision-making. The committees are operated based on stipulated regulations, and the convening status and resolutions made by the committees are reported to the Board of Directors.

### Audit Committee

The Audit Committee is entirely composed of external directors, including experts in law, finance, and management, to supervise management in a transparent and professional manner. The history of committee activities is disclosed transparently. From 2021 to June 2022, the Audit Committee was held nine times (five times in 2021 and four times in 2022) to report and resolve the audit activities

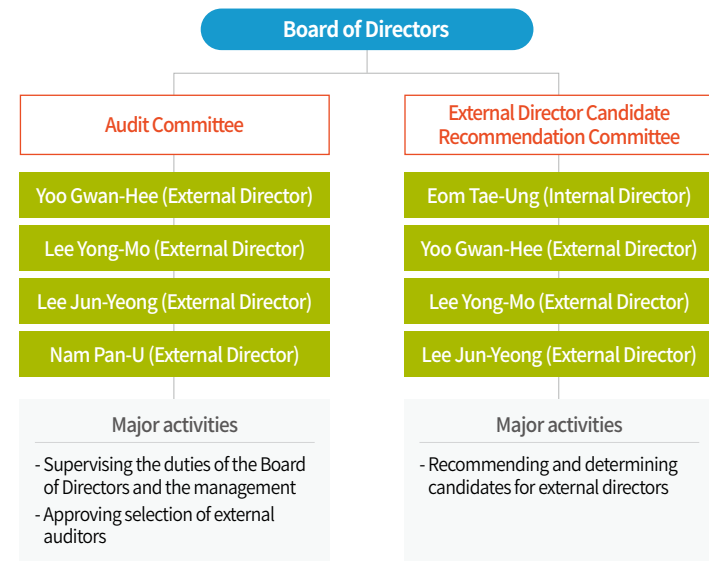

of Samyang Holdings and the appointment of external auditors. The Audit Committee is installed to deliberate on the financial statements, supplementary schedules, and audit procedures and results of external audit firms. The Audit Committee also audits the operating conditions of the internal accounting management system reported by internal accounting managers and external auditors. When selecting candidates for auditors according to related regulations specified in the Commercial Act, the Audit Committee only selects candidates from among independent external directors, with at least one of them being an expert in accounting and finance. Members of the Audit Committee, who execute duties that are independent of the management and dominant shareholder, do not receive any reward other than their remuneration as directors.

### External Director Candidate Recommendation Committee

The External Director Candidate Recommendation Committee deliberates on the company's management policies objectively and fairly, recommending and determining candidates for external directors who can supervise and support the management as members of the Board of Directors. The External Director Candidate Recommendation Committee was newly formed in 2022 and held once to recommend candidates for external directors and appoint the Chair of the Committee.

## Composition and Major Activities of Committees Under the Board of Directors

(As of the end of March 2022)

### ESG Committee

Samyang Holdings will establish the ESG Committee to manage and supervise internal and external ESG issues and make management decisions. The ESG Committee will review and analyze strategies related to the environment, social value, and governance to drive the long-term sustainable growth of the company, performing the role of a body that manages and supervises the performance and problems of sustainable management strategies.

### Operation of the Board of Directors

The Board of Directors must be operated efficiently and reasonably to make the best decisions in the interest of the company and its shareholders. Samyang Holdings has the articles and association and BoD Regulations to ensure this outcome. The BoD Regulations specifically define the authority, responsibility, and operating procedure of the BoD. The BoD sessions of Samyang Holdings is classified into regular BoD meetings held at least once a quarter and non-regular BoD meetings held as necessary. Samyang Holdings holds regular BoD meetings to approve the financial statements and convene regular general meetings of shareholders each quarter, and non-regular BoD meetings are held whenever emergencies or critical issues arise.

# Ethical and Compliance Management

Samyang Group

Samyang Group practices ethical management to grow sustainably and create competitive advantage by fulfilling its economic, social, and environmental responsibilities. In the course of expanding its businesses and growing consistently, Samyang Group has endeavored to practice the principles of ethical management while forming mutual trust with various stakeholders, such as customers, shareholders, and business partners.

Ethical management system diagram

## Ethical and Compliance Management Systems

### Ethical Management System

Ever since its foundation in 1924, Samyang Group has regarded “trust” as the core of its management activities based on integrity in management for nearly 90 years. Samyang Group defines ethical management as a “management strategy for a company to grow sustainably and create competitive advantage by fulfilling its economic, social, and environmental responsibilities.” The Code of Ethics was stipulated in 2002 as a means to institutionalize ethical management. The Code of Ethics of Samyang Group includes the basic mindset, principles, practice guidelines, and detailed guidelines. In May 2013, Samyang Group held the “ethical management proclamation ceremony” to systematize internal ethical awareness and practice ethical management according to the demands of the changing business environment.

Ethical management proclamation ceremony

### Ethical Management Principles and Practice Guidelines

Samyang Group aims to contribute to society as an “Ingredients that Add Value to Life” by fulfilling Samyang’s Values. Accordingly, Samyang Group establishes and promises to practice its ethical management principles which provide the standards for judgment and behavior, fulfilling the original corporate roles and social responsibilities. The ethical management principles, practice guidelines, and detailed guidelines are available on the Samyang Portal to all employees review at any time. All employees of Samyang Group understand and abide by the five principles of ethical management and practice the guidelines in everyday life.

### Details of the Code of Ethics

Customers		<ul style="list-style-type: none"> <li>Providing best products and services and differentiated values</li> <li>Protecting customer information and respecting their right to know</li> </ul>
Shareholders		<ul style="list-style-type: none"> <li>Maximizing the interests of shareholders and the company's values</li> <li>Increasing accounting transparency and disclosing company information</li> </ul>
Business partners		<ul style="list-style-type: none"> <li>Pursuing fair transactions and co-development with business partners</li> <li>Prohibiting unethical acts such as the receipt of valuables, entertainment, special treatment, and bribery</li> </ul>
Employees		<ul style="list-style-type: none"> <li>Responsibilities and obligations of employees</li> <li>Attitudes of employees</li> <li>Executing duties fairly</li> <li>Protecting the properties of the company</li> <li>Creating a healthy and safe work environment</li> </ul>
Nation and society		<ul style="list-style-type: none"> <li>Corporate social responsibilities</li> <li>Environmental protection and safety</li> <li>Establishing a sound market order through fair competition</li> </ul>

Ethical management pledge

Ethical education certificate

### Ethical Management System

Samyang Group operates an ethical management website to publicly disclose the Code of Ethics to be followed by all employees. Moreover, Samyang Group operates internal and external reporting channels to enable various internal and external stakeholders to report unethical activities. In addition, any reports received are handled confidentially, and we prioritize the protection of reporters so that they can feel secure when making a report.

Ethical management website

### Counseling and Reporting Process

## Reinforcing Ethical and Compliance Culture

### Ethical and Compliance Management Education

Samyang Group conducts periodic ethical and compliance education for employees to disseminate and internalize ethical and compliance management. Ethical education includes the ethical management principles, ethical management practice guidelines, and reporting system of Samyang Group. Compliance education includes sexual harassment and molestation, embezzlement and malpractice, interference in public duties, the Improper Solicitation and Graft Act, and fair transaction compliance. Education is mandatory regardless of one's job group and position. Targets of education are required to sign and submit an ethical management pledge before evaluation.

#### Details of Ethical Management Education

Division	Details of Education	Total Hours of Education
2019	Ethical management, sexual harassment prevention, personal information security, disability awareness (four courses)	5 hours
2020	Ethical management, sexual harassment prevention, disability awareness (three courses)	3.2 hours
2021	Sexual harassment prevention, disability awareness, workplace bullying prevention, ethical management, information security (five courses)	4 hours

### Ethical Management Activities

#### Presenting the Five Principles of Samyang Group for Practicing Ethical Management

Chairman Kim Yoon appeared at the ethical management proclamation ceremony of Samyang Group and explained, "Ethical management creates a firm belief that Samyang faithfully fulfills its responsibilities as a member of our society and can be trusted by stakeholders. All of our employees strive to practice ethical management, but I must urge you once again to strictly abide by the ethical management principles, regarding the principles as the Code of Conduct and criteria for value judgment." His statements mark ethical management as the starting point for creating profits in the market while fulfilling the social requirements which are perceived as essential survival strategies.

Ethical management presentation

Ethical management conference

Accordingly, Samyang Holdings, Samyang Corporation, Biopharm, Samyang Kasei, Samnam Petrochemical, Samyang Data Systems, and Samyang Innochem each held an “ethical management proclamation ceremony.” Ethical management has turned into a requisite for Samyang Group to grow sustainably as a responsible economic member of our society.

**Urging the Observation of Ethical Management Principles and Practice Guidelines**

Samyang Group held round-tour presentations for all employees. The ethical management principles must be shared to help all employees internalize the basic philosophy, strategy, and action guidelines of ethical management and embody them in daily business. Samyang Group plans to become a globally sustainable company by incorporating ethical management in the Code of Conduct for employees. The ethical management practice guidelines specifically cover customary cases of unethical behavior that may have continued without awareness. All employees of Samyang Group are obliged to practice ethical management by understanding their roles and observing the ethical management principles and practice guidelines.

**Ethical Audits**

Samyang Holdings performs regular audits, life cycle audits, themed audits, report audits, and monitoring as internal audit activities. Violations of the Code of Ethics are investigated and reported by the Management Diagnosis Team and transferred to the Personnel Committee if necessary.

Division	Details
Regular audits	Conducted once in two years at each business site, including overseas business sites, to find and spread best practices
Life cycle audits	Audits instructed by the management to be carried out four times a year on average
Themed audits	Audits performed on the entire Group or specific business departments with a specific theme
Report audits	Audits performed in response to reports received online or offline
Monitoring	Monthly monitoring of personnel, general, finance, accounting, sales, purchase, production, and environmental safety affairs and monitoring of corporate credit cards

**Status and Types of Violations of Samyang Group Code of Ethics**

Division	Unit	2019	2020	2021
Corruption	Cases	1	0	6
Business partners	Cases	2	0	2
Theft	Cases	1	0	1
Others	Cases	6	4	0
Total	Cases	10	4	9

**Violations of the Samyang Group Code of Ethics**

Division	Unit	2019	2020	2021

## Transparent Disclosure of Information

Transparent information disclosure is the foundation for sustainable growth, and trust is a fundamental value that cannot be compromised for upright corporate management. Samyang Holdings will become a trusted company by transparently communicating its responsibilities to shareholders and upholding the interests of stakeholders.

### Remuneration for the Board of Directors and Shareholder Status

#### Remuneration for the Board of Directors

Samyang Holdings does not link the evaluation and remuneration of external directors to prevent hindering the independence of external directors. The remuneration for directors is approved at the general meeting of shareholders, and individual remunerations are appropriated based on integrity and trust management, reflecting the values pursued by Samyang Holdings. The remuneration for external directors and members of the Audit Committee is paid within the remuneration limit for directors approved at the general meeting of shareholders in accordance with Article 388 of the Commercial Act and the BoD Regulations. The remuneration limit for directors approved at the general meeting of shareholders in 2021 is KRW 8 billion, and the total remunerations paid to directors is KRW 3,085 million.

(As of December 2021 / Unit : Persons, KRW million)

Division	Number of Persons	Total Remunerations	Average Per Person
Registered directors (excluding members of the Audit Committee)	3	2,938	979
Members of the Audit Committee	3	147	49

#### Shareholder-friendly Management

Samyang Holdings publicly announces important management information that can have a significant impact on investment decisions on its website and on <https://kind.krx.co.kr>. In addition, Samyang Holdings introduced an electronic voting system in 2021 to increase the convenience of shareholders, helping them exercise their voting rights through various channels. After submitting audit reports each quarter, Samyang Holdings discloses the performance presentation data through the IR section of its website to communicate with shareholders.

### Share Issuance Status and Share Ratios of Major Shareholders

Samyang Holdings grants equal voting rights according to the type and number of shares owned. One voting right is granted to one share, and preferred shares do not have voting rights. By the end of December 2021, Samyang Holdings issued 8,564,271 common shares and 304,058 preferred shares. The number of shares with voting rights is 7,435,545 shares, corresponding to 83.8% of all shares issued.

(As of December 2021 / Unit : Shares)

Division	Type of Share	Number of Shares	Remarks
Total number of shares issued	Common shares	8,564,271	-
	Preferred shares	304,058	-
Number of shares without voting rights	Common shares	1,128,726	Treasury shares
	Preferred shares	304,058	-
Number of shares with voting rights	Common shares	7,435,545	-

As of the end of 2021, shareholders of Samyang Holdings was comprised of the largest shareholder and special party concerned (41.54%), individual minority shareholders (38.06%), the National Pension Service (5.56%), and the employee share ownership association (0.01%).

## Transparently Announcing and Distributing Economic Values

Samyang Holdings communicates with various stakeholders in all business processes. Samyang Holdings pursues growth while sharing the created values with stakeholders. In 2021, Samyang Holdings achieved a sales volume of KRW 3,107.3 billion based on consolidated financial statements and distributed the economic values among stakeholders, such as shareholders, investors, employees, governments, and local communities. By considering ESG principles, Samyang Holdings will continually produce economic values under sustainable management and share its results with stakeholders.

# Business Portfolio Diversification

Samyang Group

We must actively invest in new businesses to achieve sustainable growth. Samyang Group is drawing up a blueprint for the future of each business to attain two goals : to stabilize new businesses and to improve the profitability of existing businesses.

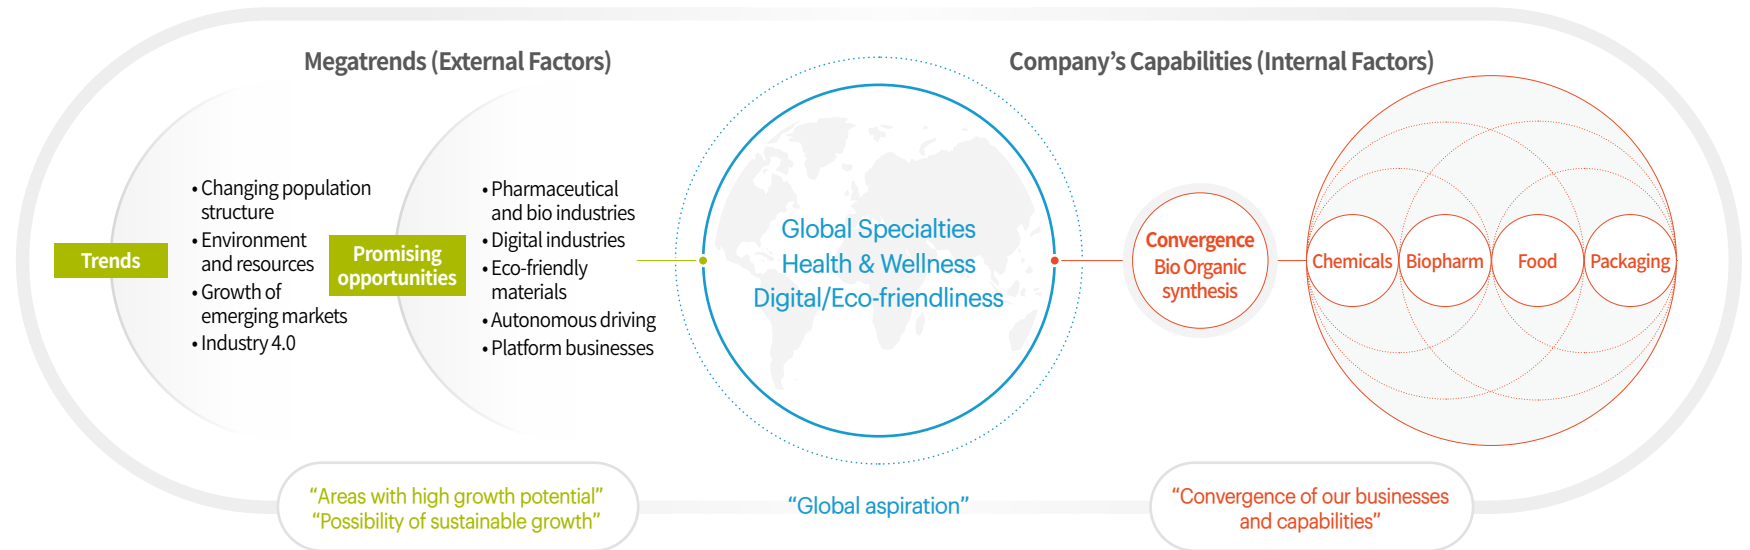

## Increasing Market Competitiveness

### Strategy for Increasing Market Competitiveness

Samyang Group promotes the mid- to long-term development of the Group by establishing 5-year growth strategies. Based on the "Vision 2025" strategy, Samyang Group prepares to write new chapters in its history in the next 100 years through continual changes. The strategic aim of Samyang Group is to sophisticate the business structure. While inheriting the directions of WIN2020 that pursues global and specialty, Samyang Group will adopt health & wellness, eco-friendliness, and digital as the three growth themes of the Group and become a global and specialized solution company by engaging in global M&A.

### Background of Execution

Vision 2025 was conceived from the intersections among megatrends, such as the changing population structure, environment, and Industry 4.0, and the internal capabilities of Samyang. After internally exchanging ideas about new businesses at mini-scale workshops, we agreed to launch the health & wellness business that can effectively utilize our bio and organic synthesis assets. In addition to health & wellness, we selected digital and eco-friendliness as new directions for growth. While promoting health & wellness, specialty materials, and solutions as primary businesses, we have prepared the basis for seeking new opportunities in digital and eco-friendly businesses.

## Directions for Diversification

Business Sector	Goals and Directions	Strategies and Outcomes
 <p><b>Food</b></p>	<p><b><u>A global solution provider in the fields of health and nutrition</u></b></p> <p>Entering the global market through leadership in specialty materials</p>	<p>Food businesses add vital energy to our lives, offering specialty materials based on food biotech, differentiated functional food, and cosmetic products. Samyang Holdings pioneers food culture with various food ingredients and technical services. Its food businesses have secured leadership in specialty food ingredients through basic food ingredients such as sugar, starch sweetener, and flour, prebiotics like kestose, resistant dextrin, and fructooligosaccharides, and an alternative sweetener called allulose. Its food ingredients distribution businesses are expanding their frozen bakery product lineup and building e-commerce bases. Moreover, Samyang Holdings focuses on global expansion with a portfolio centered on high value-added products and differentiated R&amp;D capabilities.</p>
 <p><b>Chemicals</b></p>	<p><b><u>A global chemical expert that grows with high-tech industries</u></b></p> <p>Creating and globalizing a specialty portfolio in pursuit of market growth</p>	<p>Chemical businesses led by specialty compound products enhance industrial competitiveness and lead the global market by supplying materials and solutions that are essential for the beauty and personal care industries and high-tech industries, such as semiconductors, displays, and power plants. While demonstrating stable outcomes with existing businesses centered on polycarbonate chains, the chemical businesses of Samyang Holdings have reorganized their business portfolio based on specialty solutions to find new business opportunities in the fields of eco-friendliness, high-tech industries, and personal care. Samyang Holdings will grow into a global specialty company that contributes to the competitiveness of clients by developing innovative technologies and expanding the network targeting the global market.</p>
 <p><b>Biopharmaceuticals</b></p>	<p><b><u>A healthcare value creator that improves the life quality of patients</u></b></p> <p>Strengthening the competitiveness of medical device and pharmaceutical businesses and finding new growth engines</p>	<p>Biopharmaceutical businesses help improve life quality and assist the quick recovery of patients with new anticancer drugs and optimal surgical care solutions. Reliable medical aesthetic solutions contribute to maintaining healthy beauty. Samyang Holdings Biopharm Group secured the growth engines necessary to open overseas markets based on differentiated technologies in two major business areas, namely pharmaceuticals and medical devices. Samyang Holdings especially concentrates on three areas, namely modified new drugs applying drug delivery technologies, new biopharmaceuticals using mRNA to lead future anticancer treatment, and medical devices using advanced biodegradable materials.</p>
 <p><b>Packaging</b></p>	<p><b><u>A total solution partner in beverage and packaging</u></b></p> <p>Creating and globalizing a specialty portfolio in pursuit of market growth</p>	<p>Our packaging businesses apply an advanced aseptic (*) technique to utilize beverage R&amp;D and manufacturing capabilities and supply safer products that satisfy the needs of customers and markets. They contribute to the resource circulating economy through eco-friendly materials and recycling. Samyang Packaging is maintaining a leading position in the industry based on its outstanding supply capability, efficiency, and technologies. With Korea's first aseptic filling system in place, Samyang Packaging has dominated the market by supplying cleaner and sanitary PET beverages. While solidifying its market leadership with continual facility investments and technical development, Samyang Packaging will become a total solution partner in beverage and packaging areas by expanding its entry into overseas markets and securing new growth engines such as eco-friendly recycled plastics.</p>

(\*) Aseptic : Korea's first beverage production system based on an aseptic filling method introduced by Samyang Packaging

## Performance of Each Business

### Health & Wellness Business

Our health & wellness business embraces all product and service domains for treatment, prevention, body care, and beauty. Samyang Group has already entered the health & wellness market in the food, chemical, packaging, and biopharmaceutical fields and will focus more on this area in the future.

#### Spurring the Specialty Sugar Business

The trend of sugar reduction continues, and the demand for sweeteners with low-calories continues to increase amid the increasing attention of consumers to health due to COVID-19. Samyang Corporation is pioneering new markets in the health & wellness industry through allulose, an alternative sweetener, resistant dextrin, a specialty sugar material, and fructooligosaccharides.

#### Renewing About Me With “Clean Beauty”

About Me, a cosmetic brand, defined its brand identity as “Clean Beauty.” Clean beauty used to be perceived as referring to “cosmetic products made of mild ingredients for the skin,” but its meaning has recently been expanded to include “cosmetic products that consider the environmental impact during production and use.” About Me releases products made of mild ingredients to realize clean beauty, targeting the MZ generations that engage in value consumption by adding eco-friendly values to packaging materials and product bottles.

#### Expanding the Portfolio of Personal Care Materials

KCI strives to enter the global market with its primary products and develop convergent products using related technologies. Personal care polymers and surfactants of KCI are essential ingredients used to manufacture shampoos, rinses, and cosmetic products. KCI plans to concentrate on the personal care materials business by adding functional ingredients and high value-added materials to its existing portfolio of formulation ingredients.

#### Expanding CDMO and Entering the Plastic Surgery Market

Biopharmaceutical businesses are pursuing R&D on innovative new drugs, construction of a global production base, and entry into new businesses. In South Korea, we are expanding the anticancer injection Pharmaceutical Plant in Daejeon that accords with the advanced global GMP, aiming to expand the global CDMO business. The expansion of the CDMO business has significance in expanding the scope of biopharmaceutical businesses to the field of solutions. In addition, we have also entered the plastic surgery market and requested item approvals for “Croquis,” a lifting thread brand, and “Lafullen,” a filler that uses polycaprolactone (PCL) as the active ingredient.

## Eco-friendly and Digital Materials Business

Eco-friendliness and digitalization are global trends. Related industries, such as water treatment products, eco-friendly plastics, semiconductors, and batteries, are growing continually. Samyang Group engages in omnidirectional activities to follow such trends.

### Eco-friendly Materials

Samyang Packaging, an affiliate for beverages and packaging, operates a business recycling waste plastics using innovative technologies. The plastic recycling business marks the starting point of our strategy for eco-friendly growth. Samyang Group endeavors to minimize its environmental impact by actively investing in recycling businesses.

### Information and Electronic Materials

Information and electronic materials businesses, which was once concentrated in the LCD and touch panel markets, are now focusing on the development of semiconductors and battery materials. The digital materials market is a new market that is open to new technologies. Samyang Group is attempting to enter this new market by developing its original technologies and making direct and indirect investments in companies with new technologies.

### Creating an Eco-friendly Specialty Materials Market Using Isosorbide

Isosorbide is the eco-friendly growth engine for our chemical businesses. Isosorbide is a biomaterial made by chemically processing starch extracted from plant resources. Isosorbide can be used in paints and adhesives in place of existing chemical materials, such as polycarbonate. We built an isosorbide plant capable of annually producing 10,000 tons of products in Gunsan, South Korea, and began production. Samyang Group plans to expand the application scope of isosorbide by developing various eco-friendly specialty materials and finding new markets through active external cooperation.

Samyang Central Research Center

Pangyo R&amp;D Center

## Research and Development

### Samyang Central Research Center and R&D Center

Samyang Group has outstanding R&D capabilities in the food, chemical, biopharmaceutical, and packaging industries. Samyang Central Research Center in Daejeon and R&D Center in Pangyo have researchers with excellent research capabilities. The researchers of Samyang are striving to secure original technologies and develop high-value-added products to gain competitive advantages. In addition, Samyang Group continually explores megatrend areas and expands its R&D areas to generate new future growth engines.

#### Strategic Directions for R&D

Samyang Group conducts R&D on various value-added products desired by markets and customers. Samyang's research will secure quality and price competitiveness to build new growth engines for the company. In addition, Samyang Group has recently expanded its research to add eco-friendliness to various products and technologies in response to eco-friendly issues. By collaborating with group affiliates and stakeholders, Samyang Group continually researches products and technologies that are eco-friendly, recyclable, and easy to find in everyday life. Samyang Group also executes quick, accurate, and efficient R&D by applying IT systems that keep pace with digital innovation trends.

#### Samyang Innovation R&D Fair (SIRF)

The Samyang Innovation R&D Fair (SIRF) is an event that began in 2012 and has celebrated its 10th anniversary this year. SIRF is an annual event that gathers all R&D centers of Samyang Group, such as its Food Biotech, Chemical, Biopharmaceutical, and Convergent Materials R&D Centers, Samyang Packaging Tech Center, and KCI R&D Center, to exhibit and share their research outcomes of the year. SIRF is an occasion to share knowledge and raise the motivation of employees for R&D. At SIRF, Samyang Group exhibits research projects and holds an award ceremony to recognize outstanding research. SIRF R&D Awards are selected by comprehensively considering the degree of contribution to the company's competitiveness, innovativeness, and creativity.

## Managing Intellectual Properties

Samyang Group applies for patents for technologies that have commercial and utility values to secure rights. Confidential technologies are managed as knowledge. In addition, persons in charge of intellectual properties provide close assistance to execute strategies in each patent stage (pre-application, application, and registration). Before patent application, Samyang Group gathers ideas through patent workshops, reviews the possibility of patent applications through invention counseling, and considers patentability by studying prior technologies.

#### R&D Investments of Samyang Holdings

Division	Unit	2019	2020	2021

# SASB

The Sustainability Accounting Standards Board (SASB) Index is a sustainability accounting standards index announced by the U.S. SASB and launched in 2011.

The SASB presents sustainability risk topics with high relevance to each industry, recommending companies to continually report on the topics and communicate with investors and stakeholders.

The SASB Index of Samyang Holdings was prepared in accordance with the industrial standards of the biotechnology and pharmaceuticals industries which are highly relevant to major businesses.

# Independent Assurance Statement

To readers of Samyang Holdings Corporation Sustainability Report 2021

## Introduction

Korea Management Registrar (KMR) was commissioned by Samyang Holdings Corporation to conduct an independent assurance of its Sustainability Report 2021 (the “Report”). The data and its presentation in the Report is the sole responsibility of the management of Samyang Holdings Corporation. KMR’s responsibility is to perform an assurance engagement as agreed upon in our agreement with Samyang Holdings Corporation and issue an assurance statement.

## Scope and Standards

Samyang Holdings Corporation described its sustainability performance and activities in the Report. Our Assurance Team carried out an assurance engagement in accordance with the AA1000AS v3 and KMR’s assurance standard SRV1000. We are providing a Type 1, moderate level assurance. We evaluated the adherence to the AA1000AP (2018) principles of inclusivity, materiality, responsiveness and impact. The opinion expressed in the Assurance Statement has been formed at the materiality of the professional judgment of our Assurance Team.

Confirmation that the Report was prepared in accordance with the Core Options of the GRI standards was included in the scope of the assurance. We have reviewed the topic-specific disclosures of standards which were identified in the materiality assessment process.

- GRI Sustainability Reporting Standards
- Universal standards
- Topic specific standards
  - Management approach
  - GRI 201 : Economic Performance
  - GRI 205 : Anti-Corruption
  - GRI 206 : Anti-Competitive Behavior
  - GRI 305 : Emissions
  - GRI 306 : Effluents and Waste

- GRI 307 : Environmental Compliance
- GRI 403 : Occupational Health and Safety
- GRI 413 : Local Communities
- GRI 416 : Customer Health and Safety
- GRI 418 : Customer Privacy
- GRI 419 : Socioeconomic Compliance

As for the reporting boundary, the engagement excludes the data and information of Samyang Holdings Corporation’s partners, suppliers and any third parties.

## KMR’s Approach

To perform an assurance engagement within an agreed scope of assessment using the standards outlined above, our Assurance Team undertook the following activities as part of the engagement:

- Reviewed the overall Report;
- Reviewed materiality assessment methodology and the assessment report;
- Evaluated sustainability strategies, performance data management system, and processes;
- Interviewed people in charge of preparing the Report;
- Reviewed the reliability of the Report’s performance data and conducted data sampling;
- Assessed the reliability of information using independent external sources such as Financial Supervisory Service’s DART and public databases.

# Independent Assurance Statement

## Limitations and Recommendations

KMR's assurance engagement is based on the assumption that the data and information provided by Samyang Holdings Corporation to us as part of our review are provided in good faith. Limited depth of evidence gathering including inquiry and analytical procedures and limited sampling at lower levels in the organization were applied. To address this, we referred to independent external sources such as DART and National Greenhouse Gas Management System (NGMS) and public databases to challenge the quality and reliability of the information provided.

## Conclusion and Opinion

Based on the document reviews and interviews, we had several discussions with Samyang Holdings Corporation on the revision of the Report. We reviewed the Report's final version in order to make sure that our recommendations for improvement and revision have been reflected. Based on the work performed, it is our opinion that the Report applied the Core Option of the GRI Standards. Nothing comes to our attention to suggest that the Report was not prepared in accordance with the AA1000AP (2018) principles.

## Inclusivity

Samyang Holdings Corporation has developed and maintained different stakeholder communication channels at all levels to announce and fulfill its responsibilities to the stakeholders. Nothing comes to our attention to suggest that there is a key stakeholder group left out in the process. The organization makes efforts to properly reflect opinions and expectations into its strategies.

## Materiality

Samyang Holdings Corporation has a unique materiality assessment process to decide the impact of issues identified on its sustainability performance. We have not found any material topics left out in the process.

## Responsiveness

Samyang Holdings Corporation prioritized material issues to provide a comprehensive, balanced report of performance, responses, and future plans regarding them. We did not find anything to suggest that data and information disclosed in the Report do not give a fair representation of Samyang Holdings Corporation's actions.

## Impact

Samyang Holdings Corporation identifies and monitors the direct and indirect impacts of material topics found through the materiality assessment, and quantifies such impacts as much as possible.

## Competence and Independence

KMR maintains a comprehensive system of quality control including documented policies and procedures in accordance with ISO/IEC 17021:2015 - Requirements for bodies providing audit and certification of management systems. This engagement was carried out by an independent team of sustainability assurance professionals. KMR has no other contract with Samyang Holdings Corporation and did not provide any services to Samyang Holdings Corporation that could compromise the independence of our work.

Aug, 2022 Seoul, Korea

CEO *E. J. Hwang*
